## 'Day at Drew' Program Today

'SPRING SOIREE' NEXT WEEK

ACORN

SPECIAL DAY AT DREW EDITION

Vol. 30, No. 12

DREW UNIVERSITY, MADISON, NEW JERSEY

April 27, 1957

### Friedrichs To Teach Sociology

head of the Sociology Department at Elmira College in Elmira, New York, has been appointed to fill the vacancy in the B.C. Sociology Department which will occur at the end of this semester when Dr. Benson will leave Drew to devote his full time to research work, Dr. Friedrichs will hold the position of Associate Professor of Sociology, and the appointment is a significant one for the student body since it will enable the College to offer courses in Anthropology for the first time.

Dr. Friedrichs comes to Drew with an interesting and varied background. His first teaching assignments were those as graduate assistant in Sociology at Oberlin College in Ohio and at the University of Wisconsin. As a result of his record at Oberlin he was awarded the Oberlin-in-China Teaching and Graduate Fellowship, and from 1946 to 1949 he taught at both the high school and college level in China. Dr. Friedrichs also received a teaching internship from the Ford Foundation at Columbia University, and in 1953-54 taught various courses in Sociology there, such as Contemporary Civilization. For the past three years he has been in charge of the Sociology Department at Elmira, and in addition has been teaching courses in Criminology and Penology in an Associate Degree Program in connection with the New York State Reformatory in Elmira.

#### B. C. Courses

Drew from an environment somewhat similar to ours, since Elmira has an enrollment of about 600, all in the Liberal Arts, but is a varied program in the College. The first semester courses will (Continued on Page 3)

#### **Trustees Meet**; **Retitle College**

The Drew University Board of Trustees met on April-8 and promoted four members of the college faculty, granted one member a sabbatical leave and changed the names of the college and the seminary. The Boardhas also set a date for the laying of the cornerstone of the new gymnasium.

Drs. John Bicknell, John Ollom, Donald Scott, and Robert Zuck were all promoted from the rank of associate professor to that of professor.

Dr. Benjamin Kimpel was granted a sabbatical leave for the fall semester of 1957-58. He will use his leave to write a text book on ethics entitled, "Human Life and the Moral Problem." Mr. Roger Stimson of the Graduate School will teach the only philosophy courses offered next year, "Introduction to Philosophy," and "The History of Ancient and Medieval Philosophy."

Also, it was announced that Dr. Charles Ketchan will leave Drew to teach at Allegehny College next year.

Another result of this meeting of the Board was the renaming of Brothers' College as The College of Liberal Arts." Likewide, the Seminary is now titled "The Theological School." It was then decided that the cornerstone of the new gymnasium-auditorium will be layed

Saturday, June 1. Two new trustees have been added to the Board. They are: Walter C. Bennett, the president of Phelps Dodge Corporation; and Roy E. Tucker, the president of the Beneficial Manage-

ment Corporation. The next formal meeting of the Board will be held in the fall of 1957.

## Sawin Expects Attendance Hit All-Time 300 Mark

'A Day at Drew", Drew University's annual open house program for secondary school students and their parents is being held today, on the Drew campus. The program, now in its ninth year, was first initiated by Richard Morgan, presidential assistant, who also served as chairman. This year's Director Chairman is Alton Sawin, Jr., Director of College Admissions.

Invitations from the school were sent to all the high schools within a fifty-mile radius, to all the Methodist churches in the seven surrounding conferences that help support Drew University, and to all the applicants for admission, or any person who has specifically requested information about Drew, The purpose of the program is to give interested students the opportunity to spend a day

demic year 1957-58.

college life. It will also give undecided students who have already been accepted, the chance to make the final decision on their selection of a college. Many students who are definitely planning to attend Drew in the fall use the time to obtain further information on what to bring in the line of room furnishings and clothes and to familiarize themselves with the campus. This will make their period of adjustment a little easier upon entering college.

Assisting Mr. Sawin, as part of the student committee, will be members of the Green Key, The Green Key, a recently formed service organization, conducts tours and acts as hosts and hostesses . to any visiting faculty, students and athletic teams.

**Prexy Plots** 

2-Yr.Survey

is 'organization.'

the program.

Full utilization of presently

educational components.

Graduate School.

An extensive program is being planned to help provide the visitors with an outlook on the many varied activities and advantages available at Drew. After registration in the Rose Memorial Library from 9:45 to 10:00, there will be an orientation assembly welcoming the guests and to outline the events of the day.

Special classes will be provided by the professors in the various departments. When the students, planning to attend the open house, sent in their cards of acceptance, they were requested to select three fields of study in which they were interested. From 10:20 to 12:20, classes will be held in chemistry, physics, botany, zoology, mathematics, psychology, philosophy, religion, English, speech and dramatics, French, German, Spanish, Latin, economics, political science, history, sociology, art and music. During this time each student will attend the three classes he had previously selected. This part of the program will endeavor to illustrate to the prospective student what college classes are like and how they are conducted. At approximately 12:35, the group will go to the refectory for a free luncheon.

The afternoon schedule also contains enough varied activities so that each person may choose the ones of particular interest to him. For anyone musically inclined, there is scheduled a choir concert and a performance by the college band. The athletically minded person may attend either the Drew baseball game at Young Field with Bloomfield or the tennis match with Trenton State Teachers College on the tennis courts behind the athletic field. Those with dramatic interests will be offered a production staged by Drew's dramatic group, the Foresters. One of the most important parts of the afternoon will be the campus tour, showing the visitors the facilities available here at the University. This will also include a tour of the dormitories where it will be possible to get an insight into dorm life. During the later part of the afternoon a refreshment period will be held in the recreation room at Baldwin Hall, where there will be dancing and refreshments to end the visit.

While the students are attending classes and getting a glimpse of college life and extracurricular activities, there will be a separate program going on for the parents. In the morning, coffee will be served during an informal get together. Space limitations prevent the parents from eating in the dining hall, but there is an afternoon program scheduled for them. The Dean of Women, Dean Morris; Dean of the College, Dean Withey, Jr.; Dr. Wagner and Dr. Mc Clintock, Director of the College Student Personnel, will comprise a panel that will discuss and explain college matters that might not be clear or well understood. Before leaving, the group will have refreshments.

Although the attendance in previous years has been good, the highest having been two hundred and fifty, this year's figure is expected to reach the three hundred mark. All the people connected with the program are working to make it a big success. They especially wish it to be known that they would like as many Drew students as possible to volunteer to assist in making "A Day at Drew" a pleasant day for all our guests.

#### Battin Offered AMS Award Dr. Isaac Lucius Battin, Pro-

fessor of Mathematics and Department Head, has been awarded a grant to be a member of "A Seminar in Applied Mathematics" at the University of Colorado, in Boulder, Colorado, between June 23 and July 19,

This award was made by the American Mathematical Society through funds provided by the seminar's five sponsors; the Air Force Office of Scientific Research; the Atomic Energy Commission; the National Science Foundation; the Office of Naval Research; and the Office of Ordinance Research, United States

One of the primary purposes of the seminar, which will be conducted largely by the method of informal discussions, is to increase the knowledge of the college and university teacher who is seeking to acquaint his students with important new developments in applied mathematics. During both semesters of the academic year 1957-58, the students of Drew will have an opportunity to rear some of the benefits of this project, for Dr. Battin will offer a new course, entitled "Applied Mathematics."

#### Seniors Seek Study Period A committee of students, on behalf of the senior class, has

vice-president, respectively, of the Student Council, will take office stonight at the annual Council Installation Ceremony in the college lounge. They were elected in the final series of college elections

Mr. Straut is a member of the Class of 1958, and has been active in extracurricular activities on campus as President of the Sophomore Class, and a member of the Convocations Committee.

and Social Committee activities.

Peel, secretary; and Mac Hubbard and Judy Hawkins, freshman advisors. They will also be installed at night's ceremonies.

The installation will be conducted by outgoing officers, including Jack Mc Cluskey, president; Howard Applegate, vice-president; Ellie Long, secretary; Sam Gardiner, treasurer; and Jerry Nicholas and Ellie Sheldon, freshman advisors.

Refectory, this year's event will be held in the college lounge. According to Judy Palmer, social chairman, this change is due to the

Following this, the Educational Dr. Friedrichs will come to Policy Committee voted to rethe number of credit hours for Coordinate Geometry (Math 5) and for Calculus A (Math 6) from four to three credan all-girls school. He will teach With the addition of anew Fac-

> given attention by the Faculty, who plan to offer a side show. At press time, however, the details of this event were not avail-

The next Faculty meeting will be held May 3 at 4:15 p.m. in the Mead Hall Social Room.

### **Electees to Take Posts** At Tonight's Installation

Mr. Pritchard, also a junior, has participated in both ACORN

Also recently elected were: David Joslin, treasurer; Rosemary

Unlike last year's installation ceremony which was held in the fact that the Refectory is being used tonight.

A dance will follow the ceremony.

# Best Yet'

will take place over a four day period this year, which will last from Thursday, May 2 to Sun-

The Soiree, which is the main event on the Spring Semester social calendar, will feature several innovations. The first of these is the use of a definite theme to correlate the events. The title of the theme, 'Spring Soiree", will be used instead of Spring Weekend to designate this affair.

Another innovation is the increased number of activities which will spread out over four days, instead of the usual two. A Carnival, sponsored by the Student Church, will be featured on Thursday, May 2, and will be held in the back of Mead Hall. On Friday, May 3, the Spring Soiree Informal, which will be sponsored by the class of 1958, and will take place in the Refectory. The Soiree will reach its highpoint on Saturday, May 4, when no less than five events will be scheduled. Afternoon activities will include a picnic sponsored by the Class of 1958, a baseball game between the Drew Varsity and the Drew Alumni, and a tennis match between Drew and N.C.E., all of which are to be held at Young Field. The evening will feature the two main events of the Soiree, the Senior Banquet and the Formal, both of which will take place at the Morris County Golf Club. The junior class will again be the hosts for the Formal. The Weekend will be climaxed on Sunday with a Student Recital of the pupils of Dika Newlin and Konrad

Wolff, at 4:00 in the Pilling Room. The Carnival has been given its own special theme which is "Almost Collegiate," Its co-chairmen, Marion Copeland ('58) and Barbara Jahreis ('59) promise an afternoon and evening of fun and frolic which will last from 3 to 11 p.m. Every dorm, most of the Brothers' College social organizations, and the Freshman and Sophomore Classes will participate in setting up carnival booths

(Continued on Page 3)

#### Baker to Gain By S. F. Grant

Dr. E.G. Stanley Baker has been awarded a Science Faculty Fellowship for a year's study at schools of his choice.

The National Science Foundation is giving Dr. Baker a fellowship aspart of aprogram, instituted this year for the first time, to improve the teaching of science. A total of one-hundred scholarships will be distributed annually to qualified science and engineering teachers, engaged primarily in instructing at the undergraduate college level. The awards approximate the salary that each recipient would lose by leaving his own job for the period of time stipulated in the grant in order to continue his studies. The period of study may be from three to fifteen months. Additional funds are provided for expenses connected with the fellowship studies. These studies must be in an area which would make the recipient better equipped for his teacher's duties.

Dr. Baker will spend a semester at Columbia studying genetics and evolution and their interrelationship. He will spend his second semester studying neurophysiology (nerve cells and their functions) at an undetermined institution. At the conclusion of the latter, Dr. Baker must sub-mit a report of his year's studies to the foundation.

Dr. Baker's courses at Brothers' College will be taught by Dr. Louise Bush during his absence, but Dr. Baker will be available to those Zoology majors wishing recommendations to medical and other schools.

Asbury Hall

Library

Letter to the Editor

### STUDENT UNION

As representatives of the Student Body present at recent meetings concerning tentative plans for a University Center we have observed that attendance at these two meetings seemed to indicate a lack of interest from those most concerned, the students. Two of these meetings were open to the entire student and faculty population of the University. We would, therefore, like to acquaint you with some of the proposals.

The proposed building would be a student union building channeling the various and now scattered campus activities and facilities into one more centralized place. Indeed it is hoped that more than a merely geographical convenience would be accomplished -- we look forward to a union of the various segments of the university and a more intangible aim of an advancement in the social and cultural phase of our college life.

To be included in this building would be a new dining hall. The general expression was that of having a service of meals from china dishes rather than trays. And perhaps one meal, in the evening could be served individually to the tables rather than cafeteria style. The feeling that the atmosphere of the room, colorscheme, decorations, etc., was agreed upon as being important.

Other facilities which would be included are the coffee shop, bookstore, mail room, lounge, art gallery, music ro room, publications offices, and organization rooms. A large room which would be flexible and could accommodate special meetings, conferences, concerts, dances, etc., was also considered as a necessary component of the union.

The Board of Trustees on April 8 approved the principle of the idea of a Student Union. However, these plans are still tentative and the final decision rests with the government upon an acceptable application from Drew. Detailed plans for the building and the proof ye shall be able to finance it must be submitted to the government before Drew is granted a loan. Nevertheless, plans are being made

The purpose of the meetings in Mead Hall is to elicit student pinion. Student opinion is urgently sought, in order that the most functional and beneficial center may be constructed. Upon the realization of these now tentative plans a Student Programing Committee will be formed to word with Mr. White, a technical consultant, to formulate effective working schedule for this building.

Drew students therefore are being given the opportunity and are being asked by the administration to assist in designing and planning this University Center. This addition to the physical plant of the university will probably be the most important factor influencing the complexion of campus life for many years. However, no representative from any of the three Brothers' College publications, whose lack of space and facilities are usually a chronic complaint, was even concerned enough to question whether or not there were plans for lousing them at all. And where the other interest groups? (The Foresters and Social Committee were present.) Where were the various clubs, would they be interested in meeting space? -- the religious organizations? do they have any needs? -- the music organizations? - Kappa Pi? -- anybody? Couldn't someone from among their membership have managed to schedule thirty minutes on one of the two days in order to express the feelings and needs of our respective

Future meetings to be held open to the student body will be concerned with specific room design. Student who have had experience with publications, social activities, and campus life are needed to offer suggestions from their previous experiences. Freshmen are needed since they may be the first class to receive benefit from the Center (it is hoped that the possible opening date would be in the

Participation in these discussions is not merely an opportunity but a responsibility for anyone who is interested in Drew and its

student body as soon as they are received.

Ellie Long and Roger Naylor (Ed. Note: After consultation with President Holloway, Dean Withey, and Mr. Richard Morgan of the Public Relations Office, the Editorial Board has secured rights to press releases regarding progress toward a Student Union Building. These will be made available to the

College Building

### The Story of Drew - '57

"Amid the towering forest thy halls of learning stand". Any Drew student will tell you that's the first line of his Alma Mater. Yet there are few of these students who can tell you how or why the 'halls of learning" ever got placed in such a locality.

As might be expected, the foundation of Drew University was nstigated by a woman. While passing through the territory around Madison one day. Mrs. Thomas Gibbons was so charmed by the countryside she finally persuaded her husband to purchase the land for a country estate. Her poor "hen-pecked" husband had nothing to do but to purchase 250 forest covered acres, part of which is today Drew University's spacious campus.

Having come to the New York City area from Savannah early in the nineteenth century, the Gibbons established their ways of living according to the old south. Two large farms were added to the estate till it covered nearly 1,000 acres.

The University's administration building, which is called Mead Hall today, was one of the old Gibbons mansions, built in the period of 1833 to 1836. It has been named after the wife of Daniel Drew, who secured the Gibbons property in 1867 to establish a Methodist

Mr. Drew was a great financier of his time, associating with such men as Commodore Vanderbilt, Jim Fiske and Jay Gould. For more than three decades, Mead Hall housed all the departments of the Seminary's activities save living quarters for the students. Some room were used as lecture rooms, others as professors

The great dining room was set aside as the Seminary Chapel until 1900, while the library filled one long row of chambers across the back of the building. Even with the building of Seminary Hall in 1900, Mead Hall did not cease to remain the true center of the daily life and traditions of the school, as it still is today. In 'The Building of Drew University", a history of Drew written in 1938, Charles Fremont Sitterly had this to say about the building:

'Mead Hall has thus become the wide-armed symbol and the very embodiment of Alma Mater. Her great drawing room will always be Drew's festal gathering place.'

Through the succeeding decades other donors contributed generously toward the expansion of Drew University.

Bowne Memorial Gateway, main entrance to the campus, is a ent built in 1921 to the memory of Mr. Samuel W. Bowne by his wife. Mr. Bowne contributed much of his fortune toward expanding the building facilities of the University. Mr. Bowne and Mr. William Hoyt, both members of the board of trustees for many years, donated funds for the building of Hoyt Bowne Hall, dormitory for seminary men. The latter also contributed the gymnasium and the refectory, while the former, with the help of John S. Mc Lean, provided for the erection in 1900 of Seminary Hall, which contains class rooms, faculty offices, and a chapel for the divinity school.

Very early in the history of Drew University the need for a new and adequate library building was realized. The first library, completed and ready for use in 1883, was called Cornell Library, This building, in later years, was torn down and replaced by the Rose Memorial Library, whose construction was completed in 1939. The building is a memorial to Mr. and Mrs. Lenox S. Rose, who made generous provisions of scholarships to Drew students.

In 1868 Drew was authorized by a charter granted by the State of New Jersey 'to exercise the privileges and prerogatives of a university." This status was not assumed, however, until 1928 when Leonard and Arthur Baldwin gave a million and a half dollars for a college

College enrollment has steadily increased with the years, In 1943 women were temporarily admitted to Brothers' College to compensate for the lack of men, who were participating in the war effort. In 1947 the trustees officially permitted the women to stay. then women have become an integral part of Drew Campus With increasing enrollment there arose the problem of securing adequate dormitory facilities. The dormitories available for college

and women are as follows: FAULKNER HOUSE AND ROGERS HOUSE, upperclass dormitories, were named for faculty members who formerly resided

ASBURY HALL, formerly the Gibbons' carriage house, at present houses freshman women. The dorm takes its name from Francis Asbury, pioneer of American Methodism. A statue of Francis greets all visitors as they approach the administration building from the

EMBURY HALL, now an upperclass dormitory, was once the granary and storehouse on the Gibbons Estate. BALDWIN HALL is the newest of the dormitories, available for

college men. This dormitory for undergraduate men was occupied the first time in 1953.

WESLEY HOUSE, the newest women's dorm on campus, originally housed the President of the University and his family until last year when the new President's house was completed.

Growth and expansion is still in the air. Drew University's program of future construction labeled by President Holloway as 'the Drew Advance", is already underway with the construction of the new nasium and a discussion of plans for a proposed student-union ding. To borrow a quote from a Drew Progress report written ten by Arylo Ayres Brown in 1938 with the prospect of the erection

of the Rose Memorial Library: "What (these new buildings) will mean in the lives of students, faculty members, alumni, and friends who will use (them), cannot be grasped, even in the imagination."

Baldwin Hall

### **GYMNASIUM**

Fast rising out of the ground is the newest member of Drew's family of buildings. It's situated parallel to the tennis courts at the end of a proposed diagonal walk opposite a future Commons-Student Union building. This imposing Auditorium Gymnasium is in close proximity to the present playing fields and on ground that falls away to the north providing favorable terrain for the swimming pool.

The decision to erect the structure was made by the University Board of Trustees at its fall meeting. The vote to proceed with construction came after trustee Joseph R. Ferry of South Orange, chairman of the Fund-Raising Committee, announced contributions and pledges totaling nearly \$600,000. Trustees, faculty, alumni, students, and friends of Drew have united in the fund-raising for the gymnasium-auditorium. Contributions have also been received from business, industry, and foundation. The actual campaign for this particular facility was launched in the fall of 1955 when advance gifts of \$205,000 were announced. The drive for the balance of the cost is continuing in the expectation that the full figure will be covered before the building is completed.

The building, designed by Alfred Hopkins & Associates of New York City, is being constructed of cinder block and brick, the latter providing an architectural relationship with the three new residence

construction contract, awarded to the Mahony-Troast Company of Clifton, amounts to \$75,000.

Tentative plans for the building were first made in 1949 at the onset of "The Drew Advance", the University's long-range development program. Now that the plans have crystalized it is expected that the building will be completed by December 1, 1957.

President Fred G. Holloway believes that the new structure will serve more purposes than any building ever erected on the campus. Not only will it provide superior physical education facilities, but it will also be a place for large assemblies, dramatic and social activities. In all these areas it will meet student needs which have become particularly urgent with the University's growth over the past decade. The present gymnasium was erected half a century ago for the use of 125 male students. Drew has a current co-educational enrollment of nearly 800 and anticipates a future figure of 1,000,

The over-all length of the building will be 215 feet. The width: 183 feet. This includes a wing extending in front and containing a multi-purpose room and handball courts which will help for a court outside the main entrance. A multiple purpose area will be afforded by the main section. Separate gymnasiums for men and women will be provided by means of a folding partition dividing the floor space equally. This arrangement will also allow practice sessions for indoor sports to be held on one half the gymnasium without disturbing any activities being participated in on the other half. With the partition removed, the floor will become a full-sized sketball court. In this way Drew will not have to play the basketball games at Madison High School and will bring present "home" games really home on the campus. The main section of the building will seat 1,000 spectators for athletic contests and provide accommodations for 1,200 to 1,800 when used as an auditorium. Another aspect of the use of the entire gym will be to provide

adequate space where the largest of dances and other such affairs may be held. No longer will our college dances have to be held outside the campus.

At one end there will be a large stage suitable for academic ceremonies, such as commencement exercises, as well as for dramatics, concerts and other programs,

A natatorium along one side of the main section will have a standard intercollegiate pool and special seating for swimming activities. The contour of the ground where the building is being erected will permit a split -level arrangement with the locker rooms midway between the main floor and the pool.

Drew offers many of its facilities and activities to the surrounding community without charge. The proposed building would permit an extension of this service. One of the university's best known community enterprises, the Colonial Little Symphony Society, could stay on campus for its concerts. To this and other opportunities of entertaining an increasing number of New Jersey residents Drew looks forward with much anticipation.

### Campus Personality

as Chick to all of us at Drew, is the man with a car specially geared for students who desperately need rides to get Sunday morning buns for Drew Fellowship or for those who want cider for Saturday night dances. He is

April 27, 1957

always willing and eager to give of himself or his car when he is

Mr. Straut and Mr. Straut

always jammed full, as can be seen by anyone who is fortunate enough to gaze into his little black book, but there is always time to be found for a fellow student or faculty member in Chick dabbles in almost every-

thing and strives for perfection in all. His contagious enthusiasm can be seen in whatever he undertakes. Chick came to Drew as a leader and has continued the practice since his arrival. Being athletically-minded Chick can frequently be found at the gym. He played varsity basketball and tennis in high school and has been a member of Drew's varsity basketball team since his freshman year. He has always been active in intramurals and this year he ran the basketball league.

Because he loves good music, Chick detests rock 'n roll and most other deviations from what we might call normal. He was student conductor of both the band and the chorus in high school and at Drew he manages the College choir and also sings in the University choir. He conducted the chorus in this year's Capers program, "Trial by Jury", and has led the boys at Baldwin for two years in the Christmas Carol Contest.

when one has the coveted B.A.

graduates of engineering schools.

Open: 7 AM to 9 P.M.

## Capitol Comments

One of the most important groups in Washington is often overlooked by textbooks and courses in Political science. This group is the 'Staff'. Congressmen have staffs, committees have staffs, agencies have staffs, the White House has a staff and yet they receive very little notice in modern studies. Actually as an advisory group, they serve the essential functions of research investigation and regular routine performances like typing, accounting, etc. There seems to be very wide divergence of opinion on qualifications for being a member of a congressman's staff. Some Congressmen only hire their people from their home state, others emphasize the nonpartisan aspect of their staff, while still others wouldn't hire a staff member who was not a member of his own political party.

In the case of Congressmen, each of them has a Legislative assistant whose primary function is, to take the work load off the busy Congressman's shoulders. One hardly need point out that the legislative assistant makes all sorts of minor policy decisions and in reality is the man behind the scenes in many offices. Depending on the individual Senator or Congressman, of course, a lot of time is spent by some of them in their districts working with constitutents. It is frequently said that either a Congressman is active in his constituency or he is very active in the Senate or House here in Washington. (He obviously can't be both places). In the first case, the role of the legislative assistant should not be overlooked. The Congressman must depend on him as a sort of "alter ego". This has its obvious dangers. Did the voter vote for the legislative assistant or the Congressman to represent him?

As our government has become increasingly complex we have come to depend more and more on the Sub-committee to really perform the work that in times past was carried on by the Congress itself. There is so much legislation under consideration that it has been necessary to alot its consideration into committees and of late even into sub-committees. These sub-committees, like the offices of various congressmen, have their own staffs, the size of which depends only on the importance of committee. These staffs perform an essential part of the committee's work in that they do most of research on pending bills and also employ batteries of experts on certain technical subjects.

#### **Editorial Column** A Word of Welcome -

One of the truly pleasant tasks of a college president is to welcome visitors to the campus, particularly those who may be contemplating enrolling at the institution. Whether or not you will do this, I want to extend, on behalf of the Administration and Faculty of Drew University, a hearty welcome to all of our guests today. We trust that your day will be in the truest sense both pleasant and profitable.

It is a good thing not to take a college sight unseen. Such a visit as you are making today not only gives you an opportunity to see our facilities, but it makes it possible for you to sense the spirit and atmosphere of our college. You will have the opportunity to meet some of the students already studying here as well as some members of the faculty and of the administration. We hope that the occasion will answer for you any question you have concerning college entrance. You should not hesitate to make such questions known, for this is a day on which all of us wish to be of the highest service possible to you.

Naturally we hope that many of you will select Drew as the college of your choice. At the same time we assure you that our interest in you is such that we would want you to select the institution of higher learning which you believe will best suit your needs. Whether you enroll here or elsewhere, you have our very best wishes, and in either event we hope that this day will be a memorable one for you. President Fred G. Holloway

### An 'Excellent' Balance?

Dr. J. Paul Mather, President of the University of Massachusetts, recently stated that too many colleges throughout the country have over emphasized the de-emphasis of athletics"

How true this is of Drew. "An adventure in excellence" has long been our college motto. We believe that the requirements for making this statement have been only partially fulfilled. A true adventure in excellence should be composed of a proper balance between classroom, playing field, and student activities. However, at Drew, athletics have been forced to remain in the background. To many, it would appear that only academic excellence and theology are given their proper share of administrative attention. What has been done

Drew is constructing a new gymnasium. This is a step forward. to compete with schools not on our current schedules. But it will not give us more athletes.

At present, a student who is an athlete and capable of meeting Drew's academic standards is quickly grabbed by other schools. We believe that in addition to the new building, the administration should stimulate interest in the athletic program at Drew by giving scholarships or grants-in-aid to deserving individuals.

The expense involved in building up our athletic program would be small when balanced with the returns it would give us. Let us keep our tradition and add to it.

### Letters to the Editor

Dear Editor:

The recent cause celebre in Drew politics exemplifies a situation that has regularly been discussed and rephrased in recent issues of the ACORN in one way or another: the relative immaturity of many students on the

Thrown into the open meeting argument were many pious pleas for a democratic tradition, the inviolability of constitutions. Unfortunately some of the loudest disputants remained tenaciously obtuse to an even greater ideal, he tradition of justice and fair play. In a small school whose extracurricular activities are generally based on friendly ompetition, a hot tempered semantic argument revolving upon a single word is entirely out of

In no way is the "adventure in excellence" compromised by allowing a student temporarily on the limited eligibility list to hold office, even in the student council. But it is so compromised

when the students of Drew get into a veritable verbal brawl and cannot discuss a problem intelligently in order to resolve it sensibly by emergency referendum in a mature manner. John Kingston

tunate in having a Coffee Shop. Admittedly, we would all like to have an even bigger and better one, but for the time being we must be satisfied with the one we have. Mrs. Butterworth has tried to help make the Coffee Shop a nicer place to come to eat and buy and by adding a few decora-

How many of us throw old cigarette wrappers in the trash cans instead of letting them fall

on the floor? With no effort at all we can have a much nicer and cleaner Coffee Shop. That includes everyone; B.C. Students, Seminarians and the Faculty.

### Music Notes

by Dave Ossenkop It is interesting to notice how one occurrence can be influenced by another. Sometimes these influences can take place in a most uncanny fashion. One might hardly think it possible that one occurence might affect another of a seemingly different nature, but a closer examination may cause one to find that these two happenings actually have similar characteristics which would result in the influence of one upon

the other.

Now such an occurence takes place in all phases of life, including music, and it is my purpose to illustrate such an instance. During this past month, I was fortunate enough to see both the movie version of Sophocles' 'Oedipus Rex' and the College Capers production of Gilbert's and Sullivan's "Trial by Jury". Now these two works are vastly different in character. 'Oedipus Rex" is a Greek Tragedy written in the fifth century B.C. while "Trial by Jury" is a 19th century English operetta

But what could a Greek tragedy and a light-hearted operetta have in common? However, there is a definite relationship between the two in the treatment of the chorus, Sophocles' chorus, which represents the old men of the city of Thebes, is not merely content to reflect the action taking place; it definitely plays an important role in the development of the plot. The chorus often advises Oedipus and his wife Jocasta on matters of utmost importance to them and their reaction to this advice carries much weight in determining the tragic outcome of the drama The chorus of jurymen and wo-

men in "Trial by Jury" is likewise a living organism. The members of the jury are definitely against Edwin, the defendant, and they show their disfavor quite dramatically. Furthermore, the reason for the Judge's final decision is largely influenced by the entreaties of the jury. In this way, then, the chorus tributes much to the plot (and the humor, tool of Gilbert's and

Sullivan's operetta Thus it can be seen that one medium of presentation can effect another, even though it is of a different character. This instance which I have described is no isolated phenomenon. Gilbert, the librettist of the Gilbert and Sullivan team, continued the practice of fashioning his choruses in the manner of the Greek dramaturgists. But this influence is made possible because of the relationship of the operetta to the stage play. Librettists are dramatists, for an operetta is a

type of drama set to music. Therefore, since they are dramatists, they are subject to the influences of their predecessors in that field. Gilbert happened to have been impressed by the Greek dramatists' handling of the chorus and he used such a treatment in the libretti of his and Sullivan's operettas. Hence the reason why a Greek tragedy and a nineteenth century operetta can have something in common; they are both dramatic and stem from

#### Job Opportunities

the same source.

Mrs. Smoot of the Student Employment Office performs many and extremely varied services for the student body. Perhaps the important and widely used service of the office is the baby sitting service. Mrs. Smoot's phone rings busily from nine to four with calls from mothers who need someone to babysit. She claims that this year a flood of jobs have come to her office vice of the Student Employment

Office.) The other jobs offered for the men are heavy housework and gardening jobs on a part time basis. For women, light housevisit by offering us newthings to work and positions as mothers

helpers are available. Summer employment of a rather specialized sort is another function of Mrs. Smoot's office. Jobs can be found there as camp unselors, and varied types of jobs are also available in the immediate vicinity: Morristown, Chatham, Summit, and, of course, Madison. News of summer jobs can be found on the bulletin board across from the office.

## Capers on the Carpet

Once in a blue moon one finds a whole evening of perfect entertainment. From where I sat at Capers Saturday night, March 16, the moon was most definitely blue! When I first walked into the refectory, I was amazed. Not one whiff of burned hamburgers did I smell -- not one slosh of watery lima could be heard. The dwelling places of these usual inhabitants of Drew's refectory had been put out to pasture, along with our dry-running "cows". Much to the delight of the gentlemen in the audience, the white-coated waiters who normally may be seen dashing in and out between the refectory tables, had been replaced by a group of smiling, usherettes. In any case, the change was such that I for one very nearly succeeded inforgetting that I was in the refectory. As a matter of fact, I really did forget he orchestra began playing. If they had begun to play "Attention, please announcements," I would never have been convinced; but their overture and the fine stage design transported us right to the

heavenly courts and the trial of Liliom. It was a grand show, right from the first apparition of Charcherub Peel and Angelclerk Story to Liliom's (Chuch Leport) final shuffling into the red depths of the hell he had chosen. Jim Williams and Ronnie Aulgur are to be complimented on their celestial calm and passivity, in their roles of heavenly guard and magistrate. And Betsy and Ray, as Liliom's fellow defendents made the whole audience very happy when the heavenly magistrate sent them off to their rewards.

Certainly the lighting crew deserves a big vote of thanks for the tremendously effective display of hellfire that accompanied Liliom's final descent. Both there and in the dance interlude, I thought the lighting was excellent.

As always, Joan Wither's dancing was delightful -- just the thing for a warm spring evening. She her "dolls" were lovely, especially that wild Can-can doll more commonly known as Dagi Kaugerts. After the audience had enjoyed the refreshments which the Capers committee provided, we sat down for the second part of the show -- "Trial by Jury". The first thing that struck me was the enthusiasm of the whole chorus. I don't think I've seen a whole group of such unsurpassed hams anywhere before. George Davidson's pantomime was tremendous; and the rest of the chorus was equally as interested and proficient. Chick Straut did a grand job directing; but he could never have succeeded as he did without the real spirit and zeal of every chorus member. It amazes me that there are people here at Drew who complain about lack of school spirit. If this year's Capers wasn't school spirit personified,, I'd miss

such a thing is possible, the principals of "Trial by Jury" were even better than the chorus. Ken Perinchief made a fascinating usher, and Elliot Blackburn was a very compromising jury foreman. George Groom was quite overwhelming as the stern, straightfaced, rather pedantic lawer, although confess that I don't see how he managed to keep looking so resolute throughout all the hilarious

I must confess, even from a prejudiced feminine view point, that Pat Mowry made a most beautiful plaintiff. Mike Berman, as Edwin, never stood a chance. His voice and diction were very nearly perfect. Pat's charming bridesmaids managed to add a great deal to the "atmosphere" of the courtroom too, especially when they were busily engaged in playing post office with the Judge. The latter, Brad Spangenberg was droll, witty, really enchanting. He very nearly succeeded in stealing the show and certainly would have done so if all the performances hadn't been as apt as his. Perhaps Gilbert and Sullivan were thinking of Brad when they wrote the Judge's song. At any rate, the words still apply, because "He as a Judge,

Everything seemed such a great improvement, from the sets and costuming to the stage crew, who by the way did a fine job in converting the refectory and making a stage out of Mrs. Baker's Podium. It's shame we don't have a place where such things can be put on without quite so much of a struggle with

I do want to thank everyone connected with Capers for a grand evening. I know the cast thanked Ellie and Nort for their part in doing all the organizing, directing, managing and tearing out of hair that

> Juory Crows West by John Delonas

But knowledge to their eyes her ample page Rich with the spoils of time did ne'er unroll Chill penury repressed their noble rage, And froze the genial current of the soul. Gray, Elegy

The lines just quoted, from perhaps the greatest poem ever itten, express far more eloquently than I could ever hope to what is the great value of education. The value is that it shatters the chains of ignorance which hold one to his environment, releases the person the archaic influences of some institutions and the demands of plesome and benighted social and civic laws and customs.

Knowing these times and the strange banners of still stranger men, we are in a sense waging an educational war for undisciplined minds to decide whether our way of life, our world shall disappear from this earth, to be ruthlessly replaced by an existence darker than the Dark Ages without the Dark Ages hope of a coming Renaissance. A crusade so that our God shall not be driven from our children's minds and hearts and thenceforth to be lost to all future literary, editorial, and humor, generations. That such an age, such a mental anarchy, such a physical serfdom should engulf those who are our future may well be decided on the relative merits of schools like Drew.

Education, then, is a source of freedom. Bondage can be any insurmountable problem, any wrong decision made through ignorance which has enslaved us, any life inkeeping with what we know limited by our lack of education. Yet, how can we achieve real education? Is education in terms of four years of college or something else? The end of education is to train the individual to assimilate and utilize what he observes to his own and other people's advantage. A person is valuable because of his education but surely more valuable for his potential. To put a time limit on education is likewise to attempt to put a ceiling on how far an individual may rise because of his education. Because of this social limitation we see that education can- by the Students Activities fee as not be confined to schools or years or credit hours, but only to our

The foundation of reasoning is the trained and perfected intellect. To be able to reason well is to have the panacea for problems which arise as we progress in life. Reasoning, however, will not destroy or remedy the problems that confront us in all cases. But with such near intellectual perfection the problems or problem will never destroy or remedy us. The trained intellect will not allow itself to be mpassed by knowledge or to draw a boundary line marking the end of education or to declare itself filled to capacity with wisdom. He who seeks or who has perfection of intellect must always remain free of the entanglements or temptations that a single segment of learning, no matter how lucrative and desirable, may offer; he can young men looking for babysitting never believe that he has a goal of knowledge for there is none. who says: "at last I have arrived f" he is dead. One might say that (This is the first year there there is no advantage in striving for knowledge if it is not to be aphave been so many males using plied to a practical use. One might also say that ims life-long search this particular particular series futile, for it can end but unfinished in the hands of Death. One tributary to that river of learning which we are traveling -- law (if you will) -- will suffice to keep body and soul together while we explore other branches of education. Therefore, we see that knowledge can be detached from mere philosophy and used by the individual to support himself and others in many diverse occupations. But the quest for knowledge prevents the person from becoming a slave only to his desk, or machine, quarterdeck, or his pulpit. By education we do not mean a prescribed course of study or even the use of books necessarily, for to an observant person a walk down a city street or along a country road can be an education. As for being cut short by death, that must not be shunned as horrible for death is not eternal sleep. On reaching this conclusion, we have been inspired to say that there is a goal or end to education. It is moral perfection. As christians, we say that education has as its ultimate aim, the formation of the individual, so that we will be capable and determined to strive always for that moral perfection which will result in eternal salvation. The searching mind must at last be at rest with all the searching done, the questions answered, the imponderables clarified, the relative made absolute and true at last.

went with putting on such a successful show; but I'd like to congratulate those on the other side of the curtain for you did a most commendable job. And I hope they have set the precedent, for many years to come, of putting on Capers that is well planned, well rehearsed and professional instead of the more amaturish Capers of years before. It would be a wonderful tradition -- I for one would be sure to attend.

#### **Acorn Published Regularly Since** November of 1928

The Drew ACORN when it first appeared in November of 1928, was a mimeographed pamphlet with four departments -- news, plus a special feature. Ordinarily a monthly affair, the ACORN became, in March of 1932, a bi-monthly publication.

In general, the newspaper consisted of a Letters to the Editor column, editorials, book reviews. religious news; social and athletic activities, and campus quips. The Drew emblem first appeared on the masthead in March, 1933. Payment for those first issues was not covered it is now.

In March, 1929, a report was received from the Men's Business Association of Madison saying that they would not allow any advertising by Madison stores in the paper. But in May, 1929, advertising was started. In 1932 the Madison Pharmacy submitted an ad featuring ice cream sodas at seven cents and banana splits at 10 cents.

#### A Snootful of Sassy Direct From MBT

## Kappa Pi Inducts

Kappa Pi Induction

The Kappa Pi candlelight induction ceremony was held Friday, April 5 at 7 p.m. in the Wendel Room of Mead Hall. New members who were inducted were: Helen Ivanson, Grace Longley, Bob Boyl, Enid Smith, Arlene Ricker, Eric Rasmussen and Nancy Tillman. The ceremony was conducted by Mrs. Korn, the chapter sponsor, and President Janet Porcelli. Dr. Ben F. Kimple, an honorary member, was present and provided a lovely bouquet of Talisman rosebuds for the candlelit table. After the induction the members were entertained by June Leskawa, who played a few piano selections

Dr. Singer

Kappa Pi then adjourned to the Social Room to hear their guest speaker, Dr. Paul Singer, who gave a public lecture on "Ancient Chinese Art." There was a large turnout of guests from the community and the

"The Eagles" is on the corner of 1st and 61st in Bay Ridge,

Brooklyn. At first glance you see a big windowed front with the lower half painted in with green and brown rows of diamond shapes and other geometric foolery so popular at the turn of the century. The carved wood framing the double doors and supporting the window is an orgy of pseudo-fluted pillars, lion's feet, and ringed, curvey things like a cross-section of a nautilus shell. The brick cellar which peeps up on the 61st street side runs around the corner and rises to a height of four ugly feet before it stops short of a neighboring tenement. The wood and brick are painted a lewd shiny green which only emphasizes that the carved wood is badly decayed. Here, on the First avenue side also, is a rather sinister looking door five feet above the pavement with no stairs below, which often confuses the drunks trying to climb up to it. Although the interior has been searched there is no trace of that door anywhere. "The Eagles" seems no different than the many bars that infest the Brooklyn waterfront. A rambling, square-U-shaped bar of dark wood takes up the right side. Behind this breast-work stands a scant but hardy collection of liquor bottles. Reflecting their dusty backsides is a mirror famed for having resisted a heaved barstool without breaking. Near the gilted, nymph decorated cash register stands Ed, the bartender, a tall, thin Irishman known for his generosity with the owner's beer. Running parallel with the bar on the left side are four tables with imitation marble tops for ladies. Standing watch over the tables is gaudy juke-box which is rarely played. There is no television. Drinking is a serious business and the customers want no hootchykootchy dancers distracting them while their brews go flat. In the back of the room are two doors. The right leads to an apartment belonging to 'The Eagles'" owner, a man that has never been seen. The left door to the rest room. There have been larger telephone booths. It has that air of unsanitary neglect that makes one use the facilities with their foot. Many a man with his head swimming and trying to stand on a tilting deck has been flattened against the wall by the next hard pressed customer because the door opens inward. Now let's see what kind of people are here tonight. That big handsome man with the silver hair standing in the corner is Frank. He is blind. His sister leads him down here every morning before she goes to work and takes him home again at night. He was in the army down on the base where the doctors discovered he was losing his sight. He put in for retirement and lives now on a pretty good pension. While he could still see he would come here and memorize every inch of "The Eagles." He got to know the regular customers and now that he is blind, he recognizes them by their voices and knows exactly what they look like. Seated next to him is Pat covering her freckles with powder. Her hair is mousy and uncombed, She is not exactly dirty but she has a complexion which makes her look like she always needs a good scrubbing. Her teeth are very bad. If you are quick you can count the cavities when she smiles. She smiles when you offer to buy her a drink. She is still in her twenties but is going to seed already. That dark man sitting down on the other end of the bar is her husband. She despises him and they live apart. It's best to be cautious about approaching her when he is here as he gets insanely jealous. Eventually, though, you will buy her a drink; Pat is the prettiest girl that frequents this place. Now you know what to expect from the other girls. There are fights here practically every night. The smallest guy in the place generally starts them. One minute they are slugging, the next bosom buddles and paying for each other's beer. More people are coming in. They are longshoremen from the piers here on the 10 o'clock break for a quick one. A seaman gets up and walks over to the Juke box, He has admirable taste. He presses J 21 under Classical Selections --Joe Loco's Mambo Number Five. The crowd drinks steadily, dumbly, in the haze cast by nervously puffing smokers. The Mambo ends. The seaman punches another number. The lilting strains of 'The Wearing O' the Green" resounds through the room. Suddenly "The Eagles" is transformed into Tara's halls. An elderly man starts a soft-shoe dance. The crowd falls back and claps time. Pat does a jig in the corner. Everyone is dancing. The men flip back their tails with a flourish and strut rhythmically, proudly. The housewives hoist their skirts and bare varioused legs still capable of youthful reels. Beer glasses tap and clink on the bar. A tenor voice can be heard in the bathroom. The music ends. Somebody growls: "those dirty British." The man who did the soft-shoe is having drinks pressed on him. He refuses none. The room grows quiet. It's raining hard outside and as newcomers arrive the acrid smell of wet wool fights it out with a generation of stale beer odors positions near an old woman with yellow white hair that falls in tangled neglect to her waist. She is very flattered and very drunk. "Slobs," crys Pat. She is ignored now. Her ex-husband has slipped in and is sitting down at the other end, glaring at her. The men at the bar drink uneasily; their eyes run over the beer glasses as they tilt their heads to swallow and slide first to Pat, then to the husband. The seaman is leaning on the Juke-box with one finger poised on the selector button. He has been like that for half an hour. He presses a number and slumps quietly to the floor. The three soldiers waltz with the old lady. They push and pull at each other and grunt as some random elbow hits home. The one dancing with the woman is smiling benignly; the two behind her threaten their rival with grimaces and gestures, which turn to smiles and waves as the lady pirouettes. Pat is screaming invectives at her husband, He storms out. A hand slides a beer under her nose, She smiles. She is belle of the bar once more. . . Closing time. All are gone but

## Fencers Win Two; Place in Tourney

On Saturday, March 23, the fencers suffered a setback when they came out in fifth place in the North Atlantic Tournament at Syracuse. The poor showing was due to a combination of factors, and was not as bad as it appeared since there was only a three point difference between the second place team and the fifth place. One of the high points of the encounter was Freshman Bill Blair's second place in the indi-

The following Saturday, the bladesmen snapped back fast, trouncing Cooper Union to the tune of 22-5. Drew began the afternoon by taking eight of the first nine bouts, and continued with six in the second round and eight more in the third round. Only one man, epee man Mike Rifkin, stayed in long enough to take three, due to heavy substitutions, but several others were undefeated in two bouts. The score for the match by weapons was as follows: foil, Drew over C.U. 6-3; sabre, Drew over C.U. 8-1; and epee, Drew over C.U. 8-1.

On Wednesday evening, March 27, the swordsmen won again, defeating Yeshiva for the first time in four years in a hard-fought match that was contested right down to the wire. Drew started fast, winning seven of the nine first-round bouts. But Yeshiva bounced back to make the score 10-8 at the end of the second round with nine bouts to go. The tally see-sawed up to 11-9; then the Green and Gold piled on the steam and took the next three to win the match. Bill Craven was high man for the night, turning in wins

in all three of his foil bouts. The scores by weapons were: foil, Drew over Yeshiva 7-2; sabre, Yeshiva over Drew 4-5; and epee, Yeshiva over Drew 4-5.

The end of the fencing season came on April 6th with the N.C.E. Tournament at Newark. Fencing on three strips from 9:30 a.m. to 5:45 p.m., the Drewmen took second place among eight teams present. Though they were unable to retain the trophy won last year, they turned in a good account of themselves, taking four strip championships and two weapon championships (the three strip champions in any one weapon fence off for the weapon championship), and permitting first-place N.C.E. only two strip championships in the individual honors.

The four strip champions were Bill Blair in foil, Andy Dykas and Frank Curtis in sabre, and Jim Bonar in epee. Bill Blair and Andy Dykas went on to win the tournament championships in their weapons. In the final scoring, N.C.E. had 45 bouts of 62 possible while Drew had won 38 bouts.

To recap the season, the Green and Gold swordsmen performed well. They lost only three of ten matches for an average of .700 and two of those losses were taken with three of the top men out of the lineup. Although they did not retain the N.C.E. Tournament Trophy, they fenced as a united team, and there was no one at the tournament who was not well aware of Drew's presence. As a team, they put on a fine demonstration of what can be done with limited material and an overdose of spirit; in short, Drew can be proud of its fencers.

## Girl's Sports

The girls' basketball season ended March 16th with a record of 4 wins and 4 losses. The high scorers for the season were C. De Puy, 40 points; J. Hawkins, 37; R. Peel, 36; and C. Horncastle, 34. Drew scored a total of 235 points while their opponents racked up 334 points.

The last two games of the season for Drew, were typical of those played throughout the season. On March 15th, the team played St. Elizabeth's in an away game. Saint E's new court is much bigger than Drew's which put the Drew team at a slight disadvantage. The guards' passing was inaccurate and the Saint E's forwards capitalized on Drew's mistakes and scored 54 points. Drew scored 15 points. The forwards only made 5 out of their 15 foul shots. During the first quarter only 1 point was scored. It wasn't until the last quarter that Drew started scoring. This was true of all the games this season.

The next day Drew played a close game against Orange County Community College. At the end of the 3rd quarter the score was tied 25-25, Drew came through to score 16 points in the last quarter, the most scored in any quarter of that game, thereby winning 41-33. The last part of the game Community played with only 4 players as 3 girls fouled out. Drew had a chance at 26 free throws.

Next year with the new gym, a more experienced team under the coaching of Miss Ware, the team should be able to have a winning

The faculty met the girls' volleyball team, in a game Wednesday, April 3. THE FACULTY LOST! In a hard fought contest, the faculty won the first game 15-12. The girls organized themselves better for the second game so that they would have a chance to return the spikes which the faculty consistently sent over the net. The students were winning 9-0 until the faculty got the serve and soon tied the score. Then the faculty got caught on the lines and in the net and lost the game 16-14. The last game was close all the way but the students won 16-14, clinching the match for the first time in several years. Both teams enjoyed refreshments after the game.

> Faculty Baker Bicknell Cramner Jones Obler Richards Ware Weatherby

Della-Cerra Fenby Horncastle Leitner Logan Mc Cleary Mittledorf Norris Ricker Smith Wetmore.

The girls' volleyball team has been practicing and they earlier had met Saint E's in an away game. Drew beat them last year but was unable to do so again. The score was 56-14. The game consisted of 2, 20 minute halves. The first half was played by a team of 8 who rotated their positions. At the half Drew was behind only 5 points. The second half was played by a new team playing fixed positions, something new to both teams. Saint E's had their players more strategically placed and Drew ended up by playing a defensive game. A re-match game has been scheduled.

## Ranger Nine Green; **Drop First Contests**

Young Field was the scene of the season's opener as the Ranger nine met Queens College in numbing 45-degree weather on April 3, and went down to defeat by a 10-7 score. Mills Ogden, who allowed the final Queens runs after Drew had achieved a 5-3 lead in the top of the fifth inning, was the losing pitcher. The Drew lineup was a mixture of veterans and rookies; George Hayward at short, Dewey Lonnstrom

in center, Jack Beckwith in right, Warner Johnson catching, Greg Mantel in left, Ray Strelecki on the mound, George Littlejohn at third, Jim Grace at first, and Buddy Babcowski at second.

The Rangers started strong, scoring two runs in the first inning on George Hayward's single and a long home run by Jack Beckwith, after Ray Strelecki had struck out the first three Queens batters. Queens

came back with a run in the second, and two more were forced across in the fourth on walks. Ogden then releived Strelecki on the mound, and Ray went to first base to keep his big bat in the

#### Score Tied

Greg Mantel scored the tying run in the fourth, and two singles, a sacrifice, an error and a double steal gave Drew a 5-3 lead in the fifth. Queens again tied the score as a bases-loaded single drove in two runs, and in the bottom of the sixth Ogden's single drove in Strelecki from second for the last Ranger lead. Queens scored three times in the seventh for an 8-6 margin, and added two insurance runs in the last two innings. Drew got its final run in the seventh as George Hayward doubled off the outfielder's glove in deep left, stole third, and scored on a wild pitch.

Shutout at Moravian

Drew Baseball Squad. Left to right, from front - Strelecki, Johnson, Lonnstrom, Kelly, Babcowski, Beckwith, Hayward, Sears, Grace, Coach Bicknell, Berger, Littlejohn, Lindsley, Binz, Manouse, Drey-

While we're looking at Drew's baseball results, we can take a glance at the way the big league races seem to shape up. I look for a two-team battle in the National League between the Braves and Dodgers, with the Braves having a slight edge. Last year they finished second, one game back of the Brooks, although Mathews, O'Connell and Thomson had poor seasons at the plate. Their usual good pitching and improved hitting, plus the most rugged spring training program ever, should do the trick. The old Dodgers are all a year older, and they should start to crumble a little, although they will get help from the young pitchers and two new regulars, Gino Cimoli in left and Charley Neal at second.

The Reds finished third last season, with all but two of the regulars having their best seasons. If their record-tying home run power takes the logical decline, they'll do well to repeat that finish, since the pitching staff leaves something to be desired. The Cards are somewhat of an unknown quantity, but should have enough steam to finish fourth ahead of the Phils, who need hitting badly. The Pirates, Giants, and Cubs will round out the league, probably in that order, with the Pirate youth movement beginning to pay off.

The American League seems to be composed of three divisions; the Yankees, the other "First-division" clubs, and the Orioles, Athletics and Senators in a dogfight at the bottom, probably finishing in that order.

by Reid Morrow

Volleyball, Drew's latest Intramural sport, is gaining momentum in both interest and participation. In one of the season's most hotly contested matches, on Thursday, April 11, the Sopho-mores defeated the Freshmen in two games by scores of 15-6 and 18-16, to give each team a record of 5 wins and one loss for the regular league schedule. This forces the two teams into a playoff for the title, and it will be held either the first or second week after the Easter recess. The Juniors are in third place with a single victors over the Seniors, who stand last with no wins, having forfeited several contests due to a lack of players.

Recap of Matches

In the most recent matches, the Juniors trounced the Seniors in two quick games on March 21, and in the second encounter the Frosh eked out a decision over the Sophomores by winning the third game of the set after almost blowing a 10-0 lead.

The following week the Sophs bounced back by overpomering the Juniors, and the Seniors forfeited their match to the Freshmen. On April 4th the Frosh defeated the Juniors in two games, and the Seniors again forfeited, this time to the Sophs.

Softball will begin this Monday, April 29, with games on Monday and Wednesday evenings at 6:30 on Young Field. The competition will be keen, so get out there and support your class team.

The Yankees are in a class by themselves, with last year's World Championship club supplemented by the most imposing array of minor-league talent found anywhere. Andy Carey's improved hitting seems to have removed the question mark at third, and the left-field post should be filled well by Tony Kubek, last year's Rookie-ofthe-Year in the American Asso-

Manager Kirby Farrell is working the Indians hard this year, and better hitting to go with their good pitching should make them a strong second. They have played a running game this Spring, instead of get-on-baseand-wait-for-a-homer. The Detroit Tigers also have good balance; the hitting of Kuenn, Kaline and Maxwell, plus the pitching of Hoeft, Lary and Foytack, should put them third over the White Sox, with the Red Sox fifth.

"MORRIS COUNTY'S OLDEST FORD DEALER"

of their initial victory, only to be set down abruptly by a 7-0 score. The weather was even colder than at the Queens game, but the main difficulty proved to be the Moravian pitcher, a freshman and New Jersey High School All-State player last year, who allowed only three hits and struck out 16 batters in 8 innings. Ray Strelecki doubled in the second and singled in the fifth, and George Hayward got a single, for Drew's only hits. Mills Ogden was again the losing pitcher for Drew, but this time he was the victim of poor support, as three errors were committed in the two innings he pitched that gave Moravian five unearned runs. Dewey Lonnstrom moved to the mound from his post in center field at the start of the third inning, and in the final six innings allowed only two runs.

#### Coach Optimistic

Two wins would have been alot better than the two losses, but Coach Bicknell is optimistic about the rest of the season. 'Queens and Moravian are probably the two strongest teams we will meet this year, and we had the misfortune to play them early in the schedule. The bad weather has limited our practice, but I expect both the pitching and fielding to improve with the more favorable playing conditions we will get later on.

Man - here's Your best BUY!
