

GREAT INDUCEMENT.

One hundred sets, each set consisting of three volumes of 500 pages each, comprising the entire work, from No. I., January, 1849, to No. XXIV., August, 1854, or up to the present number, are now ready, handsomely bound; a set will be sent, on receipt of four dollars. Five dollars will include the advance subscription for one year from the 1st of January. Every article is original, and the three volumes contain the celebrated "Scenes in City Practice," by the Editor, "Scenes in Southern Practice," by Dr. Dewees, and "Scenes in Western Practice," by Dr. Richmond—the most truthful and exquisite pictures of human life ever published in this country. Likewise the entire series of sarcastic and humorous sketches of New-York physicians, the series on Dress, Domestic Architecture, Literature, Special Diseases of Infancy, great popular articles on the formation of the various parts of the body, etc., etc., by the Editor. The SCALPEL, in short, has fully established its character as the greatest Health Journal of the day.

Every order for this hundred sets can only be supplied by the Editor. The price at the bookstores is \$7; no more can possibly be sold under the latter price, and it is only done now to make the returns equal the current expenses, during the pressure of the times. Address Edward H. Dixon, M.D., Box 3121 Post Office, inclosing the cash, when the work will be sent by Express. City applicants may address as above, or 42 Fifth Avenue.

NOTICES OF THE PRESS.

The *London Times* says: "A most fascinating and brilliant affair, in Jonathan's best manner; it commands the attention of every reader."

The *London News* remarks: "Flashing, spirited, and humorous, the SCALPEL is as interesting as a novel; it loses none of its raciness."

The *London Lancet*, originated and edited for thirty years by Thomas Wakley, M.D., says: "We have received ten numbers of this glorious journal for the people. We take to ourselves the credit of originating it; had there been no *Lancet* in Europe, there would have been no SCALPEL in America."

What genius! what power! From grave to gay, from lively to severe. It is an invaluable health-guide to every family.—*Daily Republican, Binghamton.*

It has all the charm of romance, without producing any of its deleterious consequences.—*Eastern Mail, Waterville, Me.*

It abounds in varied and heart-moving scenes. Your tears will flow, and your mirth will be excited.—*Daily Gazette, Taunton, Mass.*

Dr. Dixon is one of the most vigorous writers in this country, and he makes the SCALPEL one of the most readable of journals.—*Portland Transcript, Me.*

Notices of the Press.

The driest subjects are treated with such an agreeable combination of sparkling wit and humor, that you are held enchanted to the last page.—*Valley Spirit, Chambersburg, Pa.*

It appeals directly to the moral and intellectual character of its readers, and is of the first importance to families.—*True Democratic Banner, Morristown, N. J.*

A profound knowledge of human nature is stamped on every page.—*Statesman, Marshall, Mich.*

It is brilliant and interesting; and one sitting down to read it need not think of rising till it is finished.—*Gazette, Portsmouth, N. H.*

It is full of life and vigor. Wit and sarcasm enliven every page. Its editor wields a most fascinating pen.—*Radius, Fort Plain, N. Y.*

Every number surpasses its predecessor.—*Religious Herald, Va.*

The editor has exhaustless humor; comprehensive and terse, he never fails to instruct and enlighten wherever he touches. It is a work to be proud of.—*Wall Street Journal, N. Y.*

A most musical, independent, and spirited writer.—*New-England Farmer, Boston.*

Readers need not expect to find it filled with technicalities. It is decidedly rich as a literary periodical.—*Temperance Journal, Cleveland, O.*

Sprightly and refreshing, it is full of scientific acumen and irresistible wit. Well does it deserve its popularity.—*Whig, Penn Yan, N. Y.*

We never before supposed that medicine could be made popular by the attractions of tragedy, comedy, and strategy of literature. The stories are thrilling; we shall never forget "Consumption."—*Carson League, Syracuse.*

It is the ablest work before the people; its very appearance denotes character.—*Constitutionnel, Cornwall, Canada.*

The ablest, sharpest, and most independent journal of the day.—*Ovid Bee, N. Y.*

A most excellent work, and adapted to the tastes and wants of all.—*Advocate, St. Clairsville, O.*

Every intellectual man must be delighted with it.—*Perrysburg Journal, O.*

We have read every line of it. A most vigorous and original style of expression, full of wit and humor, and most unmerciful criticism.—*Journal, Bath, Me.*

Filled with excellent and characteristic sketches, and useful matter.—*New-York Tribune.*

For the well-being and well-keeping of a family, every number is worth ten times its annual cost.—*Journal of Agriculture, Boston.*

It possesses great literary ability, and teems with instruction.—*Temperance Telegraph, St. Johns, N. B.*

The editor has a style of writing that none can approach. We have never read more fascinating sketches than the "Scenes in Northern Practice."—*Atlas, New-York.*

Were we disposed to write a eulogy on any work, we do not know of one more deserving; and what is more, the work grows better as it grows older. It contains some of the most enchanting articles we have ever read.—*Dover Gazette, N. H.*

A Few Words to our Exchanges.

EDITORS, ATTENTION!

GENTLEMEN:—To say to you we are grateful for your friendship, would very poorly convey our feelings; we feel that we *know* you; we possess the evidence of your estimate of our labors in *seventeen thousand* notices in your papers! Those notices have *created* the SCALPEL. The impetus it received from the noble-hearted Wakley, of the "London Lancet," was scarcely as grateful as many of yours from the cotton and sugar field and log-cabin regions of the glorious South and West. Here, in our native city, we are *known*; and however gratifying to us the approbation of our townsmen, you received the STRANGER; therefore you have our lasting friendship. *We wish to exchange with every paper in the Union*; but it can only be done in one way. Listen a moment, and we will tell you why some of our attached friends fail to receive our journal.

Of course, you mark the notices you give us. We open with our own hands every paper of our exchange list; casting the eye over its columns, it is arrested by the notice, if there be any; this is immediately cut out, with the name of the paper, and pasted in regular columns in a large bound book. When we direct the wrappers for our exchanges, which we always do with *our own hand*, and we find no notice taken of two consecutive numbers, what conclusion can we form, but that you have ceased to regard us with favor? We cannot all think alike; therefore we do not direct a number to you. We none the less regret the loss of your friendship, and hope you will renew it; only express the wish, and we will be delighted to renew the exchange. But you see how regardless of expense we are in getting up our journal; it has not yet paid a cent; and all we expect is such a notice as your honest conviction, and your time and space will allow, favorable or otherwise, with *that copy* of your paper that contains it. When your kindness directs us your weekly issue, we feel the added obligation, and delight to look over your papers, which are opened at the midnight hour, after such harassing duties as would madden even the editor of a daily.

The power, freshness, and sincerity of many articles we read in the country press, give us a renewed impetus to fight the battle of truth. We could not exist without a mouth-piece; we mean to be heard as long as we live, and we will never stop our journal while our poor brain can concoct a paragraph, or our hand hold a pen; but we do not live by it. Our surgical practice occupies the entire day. We make our journal when many other men sleep.

	PAGE
The Preservation of the Eyes: Dangerous consequences of Pressure; evil results of opening the Eyes in Water; Lead Washes, &c.,	94
Scenes in Southern Practice: King Death in his Yellow Robe; the proud Merchant; the lovely Creole Wife; Yellow Fever in Philadelphia, '93; sudden-death; Black Vomit; Death of the proud Merchant; Human Sympathy—knowledge of its power,	97
