PREFACE

Characterized as it is by upheaval and by the ferment of new ideas, the world to-day, and especially the student class, demands of the missionary enterprise the validation of its claims through service that is socially sound, and the documentation of its work in ways that are intellectually worthy. Clearly recognizing this second fact, the Student Volunteer Movement has from time to time issued reading-lists, and, especially in connection with the quadrennial conventions, more extended bibliographies. The present compilation has been made as part of the preparation for the convention to be held at Buffalo, December 30, 1931-January 3, 1932. At the outset certain limitations were agreed upon as essential, and these limitations should be kept constantly in mind as the list is used.

The bibliography is definitely selective. With the exception of two standard books on race problems, no title is included which was published before January 1, 1928, or after December 30, 1931. This has resulted in a certain lack of balance, especially evident in the sections dealing with the Pacific Islands, and with Moslem North Africa, in which fields a paucity of recently published materials is noticeable. Furthermore, it has been necessary to omit many important books published even within these time limits, for it was thought wise rigidly to limit the list to not more than three hundred items, thereby making inescapable a drastic process of elimination. The final selection of titles was made with the personnel and the general theme of the convention constantly in mind. There are included, therefore, no books in any language

other than English; anthropology as such, however important an adjunct to the missionary's intellectual equipment, has been ruled out as not quite pertinent to the theme of the convention; while a certain unevenness in the books within the various sections grows out of the recognition of the needs both of experienced leaders and of less advanced students.

All bibliographical details have been carefully checked, and, as far as possible, where a book had been published on both sides of the Atlantic preference was given to the American imprint.
