THE PUBLICATION COMMITTEE.

Secretary's Report.

THE Fourteenth Congress of the Association for the Advancement I of Women convened in Warren Memorial Church, Louisville, Kentucky, October 20th, 1886. Kindness and hospitality were as universal as when, two years before, the Association first visited the South. The beautiful and well appointed church met all requirements for public and private sessions. The members were welcomed to private homes, and the reception, given by Mr. Douglas Sherley in honor of the President, Mrs. Julia Ward Howe, afforded an opportunity, much prized by the guests, for becoming more widely acquainted.

At the conference of officers on Tuesday evening, October 19th, Mmes. Howe, Cheney, Wolcott, Brown and Sayles, and Misses Clay and Lapham responded to their names. Dr. Julia Holmes Smith, chairman of the Committee on Nominations, made her report. Several applicants were admitted to membership. A motion that the Board try to secure members in States unrepresented was carried. Two amendments to the By-Laws were proposed, one by Mrs. Wolcott providing for a change of the month of the annual meeting in the year of the presidential election, the other by Mrs. Sayles removing the discrepancy as to the report of the Committee on Nominations. In the absence of Mrs. Sophia C. Hoffman and Miss Ada C. Sweet, Miss Laura Clay and Mrs. Mary H. Wright were made Auditors pro tempore.

EXECUTIVE SESSIONS.

At ten o'clock on the morning of Wednesday, October 20th, the President called to order the twenty members present. A letter from the Iowa City branch, received through their Secretary, Prof. Susan F. Smith, brought cordial greetings to the Association, and expressed faith in its work.

The Secretary's report, in closing, called attention to the encouraging results of the last Congress, a large Woman's Club in Des Moines, a similar society in Marshalltown, Iowa, and a branch of the A. A. W. in Iowa City. On the following morning, a letter from Mrs.

Maria S. Orwig, describing the Women's Exchange of Des Moines, and tracing its origin to the influence of the Association in that city, added a fourth organization to this most gratifying list.

The Treasurer reported a steady improvement in the finances of the Association. Mrs. Caroline M. Brown, chairman of the Committee on Topics and Papers, and Mrs. Ednah D. Cheney, Chairman of the Committee on Art, presented their reports. Reports from the Committees on Reforms and Statistics, and on Journalism, sent by their respective chairmen, the Rev. Antoinette Brown Blackwell and Mrs. Elizabeth Boynton Harbert, followed. As the other standing committees were not ready to report, the meeting turned its attention to the report of the committee appointed the previous year to consider the desirability of State organizations. As the chairman, Mrs. Mary C. Peckham, was not present, it was read by Mrs. Brown. In the opinion of the committee, the time for such organizations had not come; (1,) because the strength of the A. A. W. and its peculiarly universal work did not warrant a division of force, or promise adequate return for the labor involved; and (2,) because of the strong feeling against revising the Constitution to meet the needs of auxiliary bodies. At the same time, the committee submitted plans for independent and for auxiliary associations. The discussion resulted in extending an invitation to the Chicago Women's Club to send to the next Congress a delegate who would become a member of the A. A. W., and make a report on the work of the club; and in a motion by Mrs. Cheney to appoint a committee to consider the advisability of like invitations to other clubs. The motion was laid on the table. A suggestion was officer in each State hald resident, that the Vice-President, or other officer in each State, hold a social meeting for members only, once each vear, offering, if possible associal meeting for members only, once each year, offering, if possible, some special attraction, and, perhaps, pre-

Mrs. Wolcott announced the death of three members; Miss Lumrs. Lena C. Smith of Washington. Mrs. Cheney and Mrs. Wolcott
to prepare an account of it for the annual report. The Secretary was
sympathy, and of regret at their loss

Seventeen members assembled on the second morning. The Nixon, Mrs. Martha N. McKay, Dr. Margaret A. Cleaves, and Mrs.

Maria S. Orwig. Dr. Anna D. French reported for the Committee on Industrial Education, and Mrs. Lita Barney Sayles for the Committee on Publication. In the absence of the chairman, Prof. Maria Mitchell, the report of the Committee on Science was given by Mrs. Wolcott. The session closed with the reading of reports from several Vice-Presidents, Mrs. Pierce of Pennsylvania, Mrs. Bascom of Wisconsin, and Mrs. Cheney of Connecticut.

On Friday morning, the calling of the roll showed the presence of twenty-four members.

Dr. Julia Holmes Smith, Chairman of the Committee on Nominations, presented the ballot and the Association proceeded to the election of officers for the ensuing year.

Mrs. Hufford, Vice-President for Indiana, told of the needs and progress of the women of her State. Reports were also received from Mrs. Blackwell of New Jersey, Miss Holden of New Hampshire, Mrs. Severance of California, Mrs. Stebbins of Michigan, Mrs. Hazard of Missouri, Mrs. Mitchell of Colorado, Miss Botume of South Carolina, Dr. Trout of Canada, and Mrs. Merwin of Louisiana. After the report from the Committee on Education by the Chairman, Miss Mary F. Eastman, the meeting adjourned to reassemble at two o'clock in the afternoon.

At the adjourned session, Miss Clay, of Kentucky, reported for her State, and Dr. McCowen's report for Iowa, read by Mrs. Wright, concluded the list.

The motion for the appointment of a committee to consider the desirability of inviting delegates from various other organizations of women was taken from the table and carried, and Mrs. E. D. Cheney, Mrs. Hunting and Mrs. Hufford were chosen to act in that capacity.

PUBLIC SESSIONS.

The Fourteenth Congress was received with the respect and the thoughtful attention which has ever marked the gatherings of the Association. If, here and there, a person came to the opening meeting through curiosity, the motive was forgotten as the President proceeded with her address. After referring to the work of the Congress in broadening the views and sympathies of its members, she dwelt upon the value of associate counsel and action among women, the potency of an honest purpose, and the abiding results of faithful work.

Mrs. Howe then introduced the first essayist, Mrs. Emma Haddock, Attorney, of Iowa City, whose subject was "Women as Land-

holders in the West." The share of women in settling the vast region west of the Mississippi was briefly outlined; and the increasing number of farms owned by women, their success in taking up claims, and in enterprises now carried on by them, were carefully estimated. Dr. traits displayed by their grandmothers, in the Revolution, when they, they suffered hardship, they gained health. The farmers' wives found endured the monotony of a ceaseless round of toil without the satisfactor women in Kentucky, in carrying on farms; and cited the testimony that women are admirable managers.

Miss Ellen M. Folsom's history of the Association of Collegiate the founders of the Association, of the forming of branch organizations endeavor to supplement the Association's report on the health of girls in preparatory schools. Mrs. Cheney found, in the work of women, the greater will be their care of the home as of incalculable tory schools, and asked the co-operation of managers.

tory schools, and asked the cause of poor health among girls in preparational trial Art," by Dr. Anna D. French, President of the Woman's Institute of Technical Design in the city of New York. She held that to those who do not wish to make any branch of art a life-work. The she displayed, the work of the pupils of the large exhibit which cultivating upon the spread of photography and its influence in give the requisite time and labor to preparation. She considered

money a yard-stick for measuring the value of work, and that a person who earns something has done something which other people want.

Mrs. Mary C. Peckham's "Story of a Great Idea," written in view of the numerous celebrations of historic birthdays, traced the course of Roger Williams in Rhode Island, and the history of a memorable struggle for religious and political liberty. The essay was read by Dr. Julia Holmes Smith. Mrs. Howe, one of Roger Williams's many descendants, added a word in regard to the disputes of that day between Rhode Island and Massachusetts.

As the tap of the President's gavel was heard on Thursday afternoon, it was evident that the audience assembled was much larger than on the previous day. The first hour was given to the consideration of "Woman's Industrial Position." Believing the labor problem as it concerns woman to be the same problem as related to all human beings, the Rev. Antoinette Brown Blackwell, in a paper read by Dr. Smith, treated of individual and social interests, and advocated associated action among women, as among men. Miss Eastman, deprecating the day when women shrunk from so much labor for so much coin, yet sought money by marriage and in other unworthy ways, affirmed that rich women, they who can command their work yet see no sense in rejecting proper remuneration, are the ones who must uplift poor working women. Mrs. Sunderland followed with a brief essay by Mrs. Imogene C. Fales. Because of the competition, not only between laborers, but between the laborer and machinery, his foe, Mrs. Fales urged the specialization of work, and combination among women to maintain a proper standard of wages. At the close of the reading, Mrs. Howe expressed the belief that machinery is not a foe to women, and that the seamstress makes the machine her tool. The Rev. Augusta C. Chapin was then introduced. She found the chief causes of the inferior wages of women, after allowing for the prejudice against the sex. in women's want of purpose and training, and their consequent preference for easy and therefore low grades of work, all leading to the crowding of a few callings; the remedies, in proper training, and in the adaptation and devotion of the worker to her work. Mrs. Howe emphasized the fact that, in the higher grades of work, there is room. Reverting to the second paper, she declared competition to be healthful, and one kind of co-operation to be artificial, but looked for a better understanding of co-operation in the future. She thought money values often illusory, and, while granting the importance of working up to them, warned the worker never to work down to them. The worker's reward must lie, many times, in the benefit bestowed upon society. The educated worker raises the standard, and indirectly ben-

In place of Mrs. Ellen M. Mitchell's essay on "The Freedom of Fate," which had miscarried in the mail, Mrs. Cheney spoke for a half-hour on "Name". half-hour on "Names," pointing out the respect that we owe to our names, and the care with names, and the care with which we should use them. She cautioned parents not to give to children names which will be a trial to them through life, and to inculate names which will be a trial to them any through life, and to inculcate upon children the danger of signing any paper without reading it. paper without reading it; and urged every married woman to retain her own as a middle name. her own as a middle name.

who unintentionally signed

Mrs. Wolcott related the story of a woman

Miss Eastman spoke of the Miss Eastman spoke of the carelessness of auditors, and believed that many a financial crash could be carelessness of auditors, and believed the many a financial crash could be traced to criminal negligence on the part of such officers. Mrs. c.... traced to criminal negligence on the part of such officers. Mrs. Sunderland, after further illustrating women's lack of a knowledge of men's lack of a knowledge of business, reverted to the subject of the women's work, and indorsing Miss Chapin's remarks, spoke of the rarity with which a woman of the rarity with which a woman secures a high salaried position, of the lack of nerve in not insisting and of lack of nerve in not insisting upon equal pay for equal work, and of the responsibility resting upon equal pay for equal work, and of the responsibility resting upon equal pay for equal work, and Mrs. Cheney recalled the braver of sextones and the braver of sextones and the braver of sextones are sent and the sextones are sextones are sextones are sextones are sextones are sextones are sextones. Mrs. Cheney recalled the bravery of Margaret Fuller in demanding a proper reward for her services. proper reward for her services. Miss Eastman asked why, if it be a who is question not of sex, but of the law of supply and demand, a man who is paid fifteen hundred dollars is from the law of supply and demand, a man who is a woman paid fifteen hundred dollars is frequently given a place which a woman will fill equally well for five hundred given a place which a woman sometime women's will fill equally well for five hundred. Mrs. Brown spoke of women's

Society?" was the question considered, on Thursday evening, by in motherhood and the home; and appealed to earnest women to arouse all women to the importance of improving both. She addevoted to that end, and an effort to enlist the aid of pulpits and works. The responsibility of the individual is in the best use of opportance of the influence of heredity tunities, since other things are governed. Miss Chapin demanded a children be taught what is right, and why it is right. They should be

taught to know and to love the good, the true, and the beautiful, for Eden is before us, and not behind.

Inviting Miss Eastman to the chair, the President closed the evening's programme with a lecture on "Marriage and Divorce." Alluding first to the inequality of the marital yoke, since equal punishment is not meted out to husband and to wife in case of transgression, she pointed out the helplessness of women, as physically the weaker, without the possibility of divorce. She looked upon selfishness in its many forms, as the chief enemy of the sacredness of the home, and pleaded for a generous and helpful spirit. When holy wedlock cannot exist, divorce should come to the rescue of the one aggrieved, but if it relieve anguish, it is still an acknowledgment of failure, and rarely brings back happiness.

"The Effect of Stimulants and Narcotics upon the Health and Morals of Women" was the subject first taken up, on the third afternoon. As the writer, Dr. Mary J. Safford, was unable to be present, the paper was read by Miss Chapin. Dr. Safford referred to the want of repose in social and industrial life, causing a continued nervous strain; described the effects of tea and coffee, of tobacco through association with men, and through heredity, and of opium, bromides, and other narcotics; and specified the remedies. Dr. French dwelt upon the inheritance of the narcotizing habit, upon the nature of the opium-habit, and the thoughtlessness with which that drug is often prescribed by physicians. Mrs. Howe deplored the extent to which one woman, bringing home an evil European fashion, as that of smoking cigarettes, misleads others; and appealed to women to war against bad fashions as they would help forward good ones. Mrs. Sunderland quoted the statement of the Scientific American that fifty per cent. of the applicants to the naval academies are refused because of the effects of tobacco, mostly cigarettes; and held it be the duty of every woman to labor against this habit in men, for the sake of the daughters who may marry. Mrs. Wolcott would have this the duty of fathers as well as mothers, since there is too often a period in a boy's life when he thinks that "mother is very nice but she does not know about things." She also believed that much was to be said in excuse of drunkenness among the poor, and that it was incumbent upon the more fortunate to lend them a hand. Mrs. Cheney thought that few women knew of their danger of actual disease, or poisoning, from the use of tea; and was inclined to trace much of the friction in the home to the nervousness induced by this beverage.

The symposium on "Suffrage for Women" was opened by Miss Laura Clay. She argued that for the sake of justice, self-respect and brings. Miss Eastman was convinced that the exercise of suffrage the rights they want are women who have never suffered wrong, or in exercising the right to the ballot, womanhood using it to its highest ends. Mrs. Ednah D. Cheney's paper, wherein the need of their voice in legislation, both for their own protection and in all social and moral questions.

in all social and moral questions, closed the exercises for the afternoon.

On the last evening, came Dr. Sarah H. Stevenson's views upon an exposition and criticism of the two schools of Christian science, or have a tendency to recover;' and to the question, Can the mind cure? have a tendency to recover;' and to the question, Can the mind cure? truth; and that there will continue be epidemics of similar believers and how to take advantage of it.

The last to represented by Dr. Smith. The paper contained two schools of Christian science, or said Dr. Stevenson, "if let alone, amount of the question, Can the mind cure? The last there will continue be epidemics of similar believers the mind's effect upon the body.

The last topic was that assigned to Miss Mary F. Eastman, "The In her address, she noted the failure of our ancestors, in drawing the showed all immigrants to have a money value to the country, reflected the Pracial Strength to lie in the Chinese and the Indian, and described to lie in the Indian, and described the Indian, and the Indian India

clared a nation's strength to lie in what it can absorb.

Association to all who had in any way aided it; and after special gress of Women adjourned.

The President then extended the grateful acknowledgments of the thanks from various members to the trustees of the Warren Memorial gress of Women adjourned.

ELLA C. LAPHAM, Secretar.

The Mid-Gear Conference.

THE second conference of the officers of the A. A. W. was held at the residence of Mrs. Maria L. Owen, Springfield, Massachusetts, March 16th, 1887. The President occupied the chair. Seven were present: Mrs. Julia Ward Howe, Mrs. Henrietta L. T. Wolcott, Rev. Augusta C. Bristol, Dr. Anna D. French, Mrs. Lita Barney Sayles, Mrs. Harriet A. Townsend and Miss E. C. Lapham.

Dr. Julia Holmes Smith, chairman, sent the report of the Committee on Topics and Papers which was read and accepted, and the arrangement of the programme for the Fifteenth Congress was concluded as far as practicable.

In accepting a cordial invitation from Sorosis, it was decided to hold the next annual meeting in the city of New York, the fourth week in October.

Mrs. Julia M. Hunting, chairman of the Committee on Nominations, reported five names which were approved. The Committee on Nominations, as completed by the Board, includes Mrs. L. B. C. Wyman of Valley Falls, Rhode Island, Chairman; Mrs. Anna Garlin Spencer of New York, Miss May Rogers of Iowa, Mrs. Lita Barney Sayles of Connecticut, Mrs. Mary E. Cobb of Pennsylvania, Mrs. Sylvia Goddard of Kentucky and Mrs. Martha N. McKay of Indiana.

Miss Abby W. May's resignation of the office of Vice-President for Massachusetts was accepted with regret. Several vacancies were filled.

Mrs. Ednah D. Cheney, in behalf of the committee chosen to consider the desirability of asking other organizations of women to send delegates, reported favorably, and a motion was passed in accordance with which each of the three oldest women's clubs will be invited to send two [delegates to the Congress in New York, and to present a report.

At the request of the President, Mrs. Townsend gave an account of the informal meeting, held in Buffalo, February 8th, 1887, for the members of the Association living in that city and the vicinity. Mrs.

Townsend was asked to prepare a report of the meeting for the next

The amendments to the By-Laws, proposed at the previous conference by Mrs. Wolcott and Mrs. Sayles, were brought up for consideration. The action takes tion. Was professor of mathematics at Harvard University. There is a young tures of Prof. Agassiz on Natural Variation for permission to attend the ed. lectures of Prof. Agassiz on Natural History, but the request was re-

Soon after, Horace Mann, then president of Antioch College, and women in the chair of vited her thither to fill the chair of mathematics. She had both your great superiority of her class with a superiority of the chair of mathematics. men and women in her class, who bear the fullest testimony an affection great superiority of her class, who bear the fullest testimony and gratitude which lasted through the superiority of her instruction, and who felt for her an affection and gratitude which lasted through life.

Called home by domestic circumstances, and suffering a deep bereavement, she passed a few years in private life. She was as thorough and capable in the performance of domestic duty as in the school room. In 1867, she joined the Teachers' Committee of the New England Freedman's Aid Society and took an active part in all its work. She showed her rare judgment in the selection and placing of teachers, and in the arrangement of the classes and studies in the schools, and she gave the teachers a wise and tender sympathy which was a great support to them in their solitary and arduous labors. In 1869 she took a long journey to the South to inspect the schools and decide upon their future maintenance. Her presence was a great blessing to teachers and pupils whom she inspired with fresh courage and hope. Among other labors, she was active on a commission for selecting Sunday School books for the young.

She was one of the first women to be elected to the School Committee in the city of Boston, and did good service there until the change in the government of the schools. When six supervisors were appointed for the immediate care of the schools, she was placed upon the Board. She was repeatedly re-elected, and continued her service until she was stricken down by fatal disease.

Here she found the crowning work of her life, in which all her varied talents and gracious powers found full exercise. Indefatigable and patient in industry, she accomplished a great amount of work, in the organization of schools, arrangement of programmes, examination of teachers, and inspection of papers. It was the peculiarity of Miss Crocker's work that she combined her efforts so harmoniously with those of others, and labored so earnestly for the general good, instead of any one department alone, that it is difficult to separate her work from that of her associates, and say, this measure or reform was due to her, and to her alone. She never cared for the name of doing the thing-she did care greatly that it was done. Only those who worked with her, seconding her efforts with noble encouragement and supplementing whatever material means she lacked, can tell how much of the good results accomplished was due to her. She had what one of the teachers well called a power of "critical sympathy" which made even those whom she was obliged to rebuke, love her the better for it. She never flattered or glossed over faults, but she always appreciated effort and was quick to encourage every beginning of improvement.

An exquisite grace of manner was the fitting expression of her spirit, and grown men tell how she said, "Good morning boys," as she came into and left the school-room, as if she had entered into personal relation with them all.

She was very much interested in Natural Science, and believed that it should hold a large place in education, and she labored assiduously and successfully to introduce it into the public schools.

While her best work was special to education, she had broad sympathy with all movements for the good of humanity, and especially for the advancement of women. Her occupation seldom allowed her to be present at our meetings, but she was always with us in heart, and her life and her work furnish us with the best possible illustration and proof of the truths we are aiming to establish.

Her physical constitution was delicate and she undoubtedly worked to the full measure of the full measure up to the full measure of her strength—circumstances preventing her often from having the full "teacher's vacation," which saves them from the results of over the saves them the saves the s from the results of over pressure. But she never squandered her health and strength, but kept the and strength, but kept them sacred to the call of duty, and only a few weeks before her death shows a she weeks before her death she seemed in as good health and spirits as she

She was attacked by that fearful scourge which spares neither young or old, strong or feeble—typhoid fever—which finally affected the lungs. Her illness was short. She was conscious and serene and her last words were an entreaty to her mother "to go to rest."

SHE DIED, OCTOBER 10, 1886. Her friends reluctantly consented to a public funeral, and the city ernment directed the classic enterty that government directed the closing of schools, and it was estimated that 1,500 teachers and friends of education were present.

A. A. W.

14th Congress of Women. 1886.

TO THE MEMBERS

OF THE

Association for the Advancement of Women.

DEAR FRIENDS:

We would call your attention to the programme of our Annual Congress, appointed to be held this year in Louisville, Kentucky, on the 20th, 21st, and 22nd of October.

These meetings are remembered, by those of us who have been able to attend them, as occasions of great interest. They bring together thoughtful women from many parts of our country, and thus open the way to helpful acquaintance and co-operation in good undertakings. The papers presented and discussed suggest much that is available for future work and study, and the hour of parting always finds us reluctant to lose sight of one another, and to adjourn the fuller consideration of the topics treated of until the lapse of another twelvemonth.

We surely hope that the record of the coming Congress will equal, if not excel in value, those of other years.

ELLA C. LAPHAM,

JULIA WARD HOWE,

Secretary.

President.

Reports of Vice-Presidents.

JENNY K. TROUT, M. D., Vice-President.

N consequence of the fire that occurred in Buffalo, I feel sure that the character of 1 the reports, hastily prepared, will not compare favorably with those submitted at your Annual Meeting in October last. Speaking for myself, I have destroyed much of the data from which my former report was compiled, and I presume others are in a similar dilemma; consequently I can now send you only such information as I have accessible.

Beginning at our youngest and most western province, British Columbia, I find it as yet has no colleges or universities. Its Normal and High Schools are free and give a fair education. To these girls and boys are equally admitted. Two out of the three medals awarded by the Governor General, were carried off by girls.

The male teachers are more numerous than the female. The average salaries for women are higher than in the other provinces. Men are paid \$750 per annum while women receive \$639. The highest salaries for men reach \$110 per month; for women, \$80. The lowest amount given to men per month, \$50; for women, the same amount. All the schools are free and well supported.

All women who are on the municipal registers are tax-payers, can vote at municipal elections and for school trustees. The wives of householders can only vote for the election of school trustees. Married women can deal with their own landed property and earnings and can also carry on business independent of their husbands.

Women have an able, eloquent, earnest and persevering advocate in Mr. Drake, M. P. P. For four consecutive sessions he has brought a bill before the legislature to give women the franchise, and although it has always been defeated, yet on the last division it was supported by more than a third of the house.

There is an absolute scarcity of women servants, the household work being chiefly performed by the Chinese.

Between British Columbia and our next province lies an immense tract of undeveloped country, at present partly occupied by occasional settlements of whites and various Indian tribes.

Manitoba, our next province, is also young in years, but is developing very rapidly. In Winnipeg, the capital, in 1871, there were only a few scattered houses and but one school, now it has numerous common schools with high schools, colleges, collegiate institutes, convents and Manitoba University. The university under the auspices of the Presbyterians, was originally intended for men, but on investigation it was found there was no clause to exclude women, and the applicants had to be admitted.

The number of women engaged in teaching is slightly in excess of men. In rural schools women receive \$30 to \$40 per month, men, \$35 to \$50; while in the cities men get \$800 the first year, and women, \$500.

A considerable number of women are engaged in agriculture and commerce. A prominent lawyer writes me that in offices young ladies are supplanting young men. Especially is this the case where they use type-writers, or if they understand phonography. He thinks that in a few years there will be more young ladies engaged in are giving excellent satisfaction. They are also being introduced into the law offices and

are giving excellent satisfaction. Domestic servants are very scarce.

The legal status of women there, is also broader than in the other provinces.

Married women have all their rights under the law the same as the other sex. They may sue or be sued, and are liable for any debts they may contract, whether they have a separate estate or not

East of Manitoba lies Ontario, the most populous, wealthy, and important province in the Dominion.

In Toronto University three young ladies were capped and gowned for the title of B. A., while Miss Margaret Nelson Brown in addition, won the enviable distinction gold medalist this year in modern languages. There are eight women among the Arts under graduates. There were 108 women who underwent the University local examinations for women; that is for women who study at home under tutors or ton, two receiving the degree of M. D; C. M. and one B. A. During the past there are three local schools at Kingston, Ottawa and London. In July free Industrachers. As many as 246 attended, the results being most satisfactory, of this During the title

During the year a competition for a gold medal took place among the students of this and all affiliated schools for the best work in drawing from the antique cast and designs. The prize was secured by Miss Ida N. Banting of Toronto. Of the eleven pictures sold at the Montreal Exhibition, two were painted by Paris was given to Miss Ida Joy, Ontario. Another Ontario lady, Miss Fanny Sutherland, being hung "on the line" of the exhibition of the Royal Academy, London, England. In her Studies of Plant Life in Canada. The illustrations of this useful and beautiful marks on the customs and language of the Iroquois," and Mrs. A. W. Buckland The female teach.

women are engaged in journalistic work than heretofore.

As a result the Board of Trustees have adopted a schedule by which there is a specific of the fifteenth year. The first year the salaries shall be \$53241

gradually increasing until \$636 is reached on the fifteenth year. This is on the basis of length of service alone. After that period the board promised to give "due consideration to the salaries of those who have served a greater number of years." This "will not interfere with paying higher salaries to those ladies who may be called upon to fill any higher positions in the gift of the Board." Industrial schools for both boys and girls have been started in Toronto under favorable conditions. I hope to give successful reports from each next year. We have also an industrial refuge for girls under the same roof yet completely separated from the reformatory for women. The girls are neatly dressed and in good health. They are taught all the different branches of domestic work and the report shows good progress in the schoolroom, where the children spend four hours each day. After teaching them to read and write well, special attention is paid to their domestic training. All the officers in the refuge are ladies except the bursar, and they are appointed by the government. There is a good library for the inmates in connection with the institution.

In looking over and comparing the commitments to our common gaols, I am surprised at the great decrease among women. In 1869 there were 3,599 men and 1680 women sent to jail, while in 1885 with more than double the population, we have 9868 men and only 1557 women. In 1885 there were 6238 men sentenced out of the 9868 commitments, and 1063 women out of the 1557 arrested. The crimes for which both sexes were arrested and sentenced were in order of numbers, drunk and disorderly, vagrancy, and larceny. The unmarried criminals almost doubled in number the married.

The W. C. T. U. is better organized and doing more efficient work than heretofore.

There was a decided advance all along the line by the women voters at municipal elections. In Toronto they secured the election of the temperance candidate. Nearly a years trial has proved him to be the best mayor Toronto ever had.

In regard to the average wages paid to both sexes, taken from the official labor and wages report for the two months of April and October, 1884, I find that in bookkeeping the salary per week for men averaged \$11.85, women, \$4.90; Bookbinders, men \$12.24, women \$3.41; Finishers in the boot and shoe factories, men \$7.80, women \$3.53; Cigarmakers, men \$9.45 women \$3.22; Packers in the same trade, men 9.67, women \$3.36, Confectioners, men \$8.48, women \$2.44; Cotton Mill finishers, men \$7.35, women \$4.71; Pecker-tenders, men \$6.05, women \$5.22; Roving hands, men \$5.26, women \$4.67; Spinners, men \$7.69, women \$4.55; Weavers, men \$6.72, women \$5.93; Glove factories, men \$11.43, women \$4.95; Upholsterers, men \$10.52, women \$4.30; Japanners, men \$9.41, women \$3.09; Knitting factories, knitters, men \$7.83, women \$3.21; Paper Bag factories, men \$6.00, women, \$3.62; Paper mills, Finishers, men \$6.98, women, \$4.73; Rag Cutters, men, \$8.79, women \$3.60; In stores, Salesmen, \$9.20, Saleswomen \$3.78; Screwmakers, men \$7.44, women \$3.54; Tailors, men, \$9.62, women \$4.00; Tinsmiths, men \$8.84, women \$3.02; Whipmakers, men \$7.20, women \$3.40,; Woolen factories, Dressers, men \$6.22, women \$3.77, Finishers, men \$6.96, women \$3.33; Weavers, men \$6.00, women \$4.50. The above figures are for men and women over sixteen years of age and for the same kind of work. Corset-makers get \$4.40 per week, Dress-makers average about \$4.35, Milliners \$7.03, Robe-makers (undertakers), only \$2.65. Using hotel employes gives us an idea of relative wages of house-servants per week, these, however include board and lodging, Chambermaids \$2.17, Cooks \$4.82, Kitchen Girls \$2.14, Laundress \$2.15. Their porters and stablemen get \$3.56.

Scarcity of good domestic servants is the cry from all parts of the country. I find the average price paid such help in the country is (with board and lodging) per month, Farm Hands (men) \$17.92, Domestics (girls) \$7.00. Poorly as girls are paid in factories, they prefer working in them to domestic service. I think one great reason is, they have their evenings and Sundays to themselves, in factory life, whereas with domestics it is morning, noon and night, Sunday and Saturday. In the cities, it is true, they have their afternoon out and in the country a day occasionally.

From returns collected from 2853 work people we find for the year ending October 31, 1884, that the average time, employ, wages earned and cost of living were as follows, taking men and women over sixteen years of age and engaged at the same work:—

Trades.	Sex.	Hrs. per Wk	Days.	Wages.	Cost of Liv's
Bookbinders, r	nen	57.05	300.25	\$600.00	\$518.75

The province of Quebec has been, to a large extent, a century under French domain. To-day the people of that nationality certainly hold the balance of power. Although Protestants do not number more than one-third of the population their influence has done much in moulding public opinion. Consequently the Catholic schools are much better than they were.

Their women teachers are paid the smallest wages in the Dominion. Their Superintendent of Schools in speaking of the low wages of teachers says "that a domestic servant earning \$5 a month is better off than the female teacher who is paid

McGill University, Montreal, under Protestant control, is the leading school in the province. Two or three years ago it opened its doors for the first time to woman, and to-day it has an endowment of \$120,000 for her special benefit. This was donated course of four years. There are fifty-one women in attendance, twelve of whom are under-graduates. Steps are being taken to begin a new college for ladies under for this purpose. Miss Scott also bequeathed \$15,000 for the same object, and the Hon. D. A. Smith, who gave the munificent endowment of \$120,000 to McGill, has

offered conditionally a donation of \$25,000 to the Presbyterian college for ladies. It is entirely non-sectarian in its principles. The Stanstead Wesleyan College embraces both sexes and gives a good course of instruction. There is a proposition to make it entirely a woman's school.

The Princess Louise left her imprint in Canada through the impetus she gave to art. Herself an artist of no mean order, she took a warm interest and did all she could to encourage and foster it throughout the Dominion. The Montreal Society of Decorative Art under her patronage is a corporate body and controlled by women. Its objects are both benevolent and industrial, affording an opportunity to individuals to dispose of articles at a fair price and to afford facilities for instruction in decorative art. During the year 686 articles were sold realizing \$1571.74. There are several good schools of art in the province. The children here, as in Ontario, are taught drawing in the public schools. Hon J. G. Ross has presented a site on which to erect a building for an art school in the city of Quebec. An efficient W. C. T. U. is at work against the old enemy.

New Brunswick was originally settled by a good class of people, among whom were many M. E. Loyalists. Hence, in many ways it has been a progressive province. In educational matters it will compare favorably with its larger sister Ontario. It has its Provincial University with power to confer degrees. The Methodists too have a college at Mount Allison at which over 100 ladies are in attendance. In 1882, Hattie L. Stewart was the first woman in the Dominion of Canada to receive the degree of M. A. In the same session three ladies graduated in arts and quite a number in some of the other branches. Besides this school the University and Sackville college are open to women. Teaching seems to be the favorite employment for women. In this province in 1885 there were 1600 teachers employed, of these no less than 1151 were women whose salaries in the three grades averaged about \$260, while the men's salaries in the same classes, reached an average of \$402, being a fraction over one-third more. There are several lady physicians in successful practice. Domestic servants are scarce. In municipal affairs women who have the necessary property qualification may vote, also in school elections.

Prince Edward Island is the most easterly province and probably the smallest in the Dominion of Canada. Its inhabitants are exceedingly conservative in their ideas, therefore slow to change; indeed, so averse are they to any innovations that women are little, if any better off than they were fifty years ago. About the only employment that they have outside of domestic work is teaching. And in that department, unlike its neighboring provinces, it employs a less number of women than men, the number of the former being 223 while the latter reaches 271. The average salary for men is \$310 while women are paid for teaching in the same grades an average of \$226.

In the province of Nova Scotia a great deal of progress has been made in educational matters. Dalhoune College, Halifax, is an excellent school and it is on a good financial basis having received several large sums of money. It is open to women and numbers have availed themselves of the privilege and several have received degrees. Kings College, Windsor, is the oldest Church of England school in the Dominion. It, too, confers degrees on both sexes. Acadia College, under Baptist control, offers similar advantages. In this province there are several lady physicians, one of them, Dr. Anquin is resident physician of the Infants Asylum, Halifax. A large proportion

of the teachers are women. They represent 60 per cent., numbering 1500 while there are only 566 men. Women are paid an average salary of \$238 while men average in all the grades \$304 per year. If I interpret the statutes correctly, women are not prohibited from voting for school trustees or at municipal elections, although I am not aware that they have yet exercised this right.

In the foregoing report I have endeavored to give a good idea of the status of women in our several provinces. But owing to the difficulty I have experienced in would wish.

JENNIE McCowen, M. D., Vice-President.

I HAVE the honor to report, on behalf of Iowa, that during the past year our women have been steadily advancing along all the lines of activity heretofore

In regard to the special questions asked by the committee on reforms and statistics, I may say that as county superintendents of schools, women are serving in eleven of the ninety-nine counties, receiving the same compensation as do men superintendents, \$4 per day. In the cities, women receive from \$600 to \$1,000 or \$1,000 per year. In a few instances their salary is the same as received by men in similar positions, but in more cases it is less, and in most cases the positions with highest salaries are habitually given to men, while the inferior positions at lower salaries are filled by women. The average compensation per month in graded schools would probably be \$45 to men and \$40 to women.

Mrs. A. B. Billington, of the Department of Public Instruction, has kindly sent me the following figures for the state of Iowa:—

	Number women	8
1870	teachers. +	Average salary
1875	14,344 14,394 14,344 17,906	per month.
1880		
1005,	14,344	6.28
+	17,906	20.40
Ac 0 1	General average	29.70

As a member of the committee on education, Miss Hamilton, the lady member of the State Board of Examiners, has sent to Miss Eastman a very comprehensive not dwell on this topic.

In charitable and philanthropic matters our women continue to manifest an active interest. We still have no state board of charities, and delegates attending the delegates from Iowa this year, who were sufficiently interested to go to St. Paul, under the women delegates, and a woman was re-elected as corresponding secretary for the

The need for a reformatory prison for women is still being agitated in various quarters with a reasonable hope of securing favorable action from the next legislature.

Some changes have been effected, (chiefly through the labors of the Woman's Christian Temperance Union,) in our statutes, regarding the protection of young girls. The age of consent was raised from ten to thirteen. The women asked that it might be raised to eighteen, the age at which a girl may control her own property, may make a contract, may consent to her own marriage. The gentlemen assured them it would be simply impossible to pass such a bill, and fixed the age at sixteen. The committee of both houses dropped it to thirteen, and the bill so amended, passed. An amendment was adopted depriving the parent or guardian of the power of legally consenting to the debasement of children under the age of eighteen years, and another making it a crime to "take or decoy a child" from its parents or guardian, under the age of fourteen years. An act was passed to suppress the circulating, advertising, and vending of obscene and immoral literature, also an act providing for a separate apartment in jails and prisons for the detention of women; an act providing for the teaching of temperance physiology in the public schools and educational institutions in the state, and also a very stringent prohibitory liquor law.

The various societies of women are faithfully at work, each one within the limits of its own organization. The temperance women in addition to various other lines of reformatory and philanthropic effort, are hopefully advancing along the line of systematic study of practical hygiene (supplementary to the physiology of the schools); its relation to the individual, the family and the community; and the relation of dietetics and unsanitary conditions in general to intemperance. Courses of lectures to women, hygienic clubs for girls, special addresses on matters pertaining to social purity, the responsibility of parents in matters of hereditary transmissions, mother's meetings, etc., chiefly conducted by women physicians, are reported from an increasing number of unions, and much good has already been accomplished in exciting inquiry and arousing discussion.

The Iowa Woman's Suffrage Association, ever active in influencing public opinion through the press, has this year established its own organ, *The Woman's Standard*, a bright eight-page monthly published in Des Moines. The industy of Iowa women was well represented at the State Fair, which was this year permanently located at the state capital. Both, the temperance and the suffrage women, erected permanent buildings on the grounds, the former holding each day a public meeting, the latter furnishing refreshments, and each contributing literature.

The Woman's Relief Corps, auxiliary to the G. A. R., finds in Iowa congenial soil, and is increasing in numbers and efficiency. This society maintains a department in the G. A. R. Advocate devoted to the interests of the order. W. R. C. No. 34, of Davenport, has the honor of having sent to the support fund of Anna Ella Carrol a larger amount than any other corps in the United States.

The American Educational Aid Association, with headquarters at Chicago, has begun to organize local advisory boards in the towns of Iowa. Its objects are two-fold: first, finding homes for destitute children of either sex; second, superintending the education, in existing institutions, of bright girls who are friendless and destitute. Almost from the foundation of our government, promising young men have been aided pecuniarily and otherwise by the benevolent, but so far as I am aware no organized effort has hitherto extended a helping hand to promising young women who were unable to make a start without assistance.

In journalistic work, women are going steadily forward. The number of reporters, correspondents, compositors, and department editors is increasing, and some of the most trenchant editorials of some of the leading dailies have been acknowledged to be the work of women. The most notable departure of the year has been the addition of a woman to the editorial staff of an orthodox medical journal, The Iowa State Medical Reporter, to have charge of a department devoted to "Medico-Legal Questions and Neurology,"

In business circles, women are every year feeling their limitations less, and are encouraged and strengthened in independent effort by the record of few failures and no defalcations. There is a continued increase of women employes in every department of business activity. In professional circles, the most decided advance, perhaps, has been made by physicians and ministers. The year has been one of increasing activity among the Women's Missionary Societies, both home and foreign, of the various churches. The State Dental College, at Iowa City, has graduated its first lady student. Several patents have been issued to Iowa women during the year, most of them being articles to lighten domestic labor.

The impetus given to the activities of our women by the Congress held last year in Des Moines has been manifested in many ways, notably in the organization of women's clubs in different parts of the state, among which may be mentioned those of Des Moines, Marshalltown and Iowa City, and the Woman's Exchange of Des Moines. The latter opened in August for the reception and sale of woman's work, numbers now about fifty members, with twice that number of consignors. It has pleasant rooms centrally located, and in the near future contemplates adding to its accommodations and facilities for helpfulness to women.

We are asked to speak also of the "needs" of our state. No one need could be mentioned, perhaps, which would strike a responsive chord in the minds of so great a number of families as that of capable domestic service. The School of Domestic Economy, at the State Agricultural College, at Ames, while a step in the right direct tion, is for house-keepers rather than for domestics. The "training school for servant girls," which shall give practical instruction and daily drill until proficient, in all branches of domestic work, has not yet been evolved from the inner consciousness of

In conclusion, let me say that no one can be more keenly alive to the inadequacy of this report for Iowa than myself; and in presenting it, I beg to be relieved from further service as vice many support for Iowa than myself; and in presenting it, I beg to be relieved from signal further service as vice-president. The increasing burdens of an active professional life render it impossible for life render it impossible for me to devote that time and attention to the duties of the office which they demand, and to which Iowa is rightfully entitled.

LAURA CLAY, Vice-President.

HAVE not obtained as much information as I would have liked in answer to the two questions asked by the committee has been to the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions asked by the committee has been the two questions as the two questions as the two questions asked by the committee has been the two questions as the two questions as the two questions are two questions as the two questions as the two questions are two questions are two questions are two questions are two questions and the two questions are twell as the questions are two questions are two questions are two questions are two question two questions asked by the committee. As far as I have learned, there has both no increase of women teachers' salaries as compared to men's, though, I believe, have improved. However, there has been a very perceptible advance in the confidence placed in the ability of women teachers, and of willingness to employ them. Upon asking the gentleman who gave me this information to what he attributed the fact that women teachers did not receive equal wages with men for the same work, he replied at once "Because women have always been more or less oppressed, and always will be." I myself have not been able to discern any reason peculiar to Kentucky.

I think no clear view of the industrial condition of women can be obtained unless there is borne in mind that two distinct and great influences have been at work within the last twenty years. The first, of course, is the freeing of the slaves. This has had a strong effect even upon the labor of men, and much more upon the labor of women, of which I will try to set forth a few prominent points. All the wealthier classes owned slaves, by whom practically the whole of the housework was done. The mistresses superintended their houses, very generally their gardens and yards, and the rest of their industry was expended in sewing. In all industrious families the ladies expected to do all the sewing of the family with the assistance of the slave women, except dressmaking and tailoring. To put out plain sewing was the exception, not the rule, even in wealthy families. Of course, it was still rarer to put out washing, this being done exclusively by slaves. I make these remarks to show how hard slavery bore upon that part of the white population who had no resource but the labor of their hands. Now, the wealthier women find their household cares so great that they have to give up sewing nearly entirely, and, as in the northern states, there is now an army of sewing girls who earn a comfortable living, either taking in sewing by the piece, or going from house to house sewing by the week, for board and wages varying according to their skill and the locality.

Much the same change has gone on in teaching. Only the hardest necessity could drive a Kentucky born woman of sufficient education to teach, to any effort at self-support. The proportion of male teachers was much greater than now; nearly all of the women and many of the men coming from other states. Now it is not so; nearly all our public school teachers and large numbers in private schools being Kentuckians and a large proportion women. I can think of only one occupation for women which was facilitated by slavery; that is farming. The wealth of Kentucky being largely agricultural, it often happened that women with invalid husbands or widows, found it to their interest to continue the business of their husbands. This with slave labor was easily done and without exciting comment; and it is still done by women owning farms to a much greater extent, I suppose, than it ever was in a free state. With this exception, however, slavery had a depressing effect upon all money making pursuits for women.

The second great influence to which I alluded is one that has extended over our whole country, and is commonly known as the Woman's Rights movement. Its influence is becoming every year more evident. Its first effect, of course, was to fill the schools with women teachers. Twenty years ago, as I said, only hard necessity would drive a woman to any thing so independent as school teaching. Now it is common to see young women of good social position and comfortable means teaching; partly for something interesting to do, for self-improvement, and partly from a spirit of independence; while numbers who once would have eked out a slender maintenance by painful economies now prefer to live comfortably by turning their talents to money making pursuits, unhindered by the prejudices which would once have bound them. I observe that within the last ten or eight years large numbers of shop girls are employed in the smaller cities or towns; before that, stores in which they were employed were exceptions. I am pleased to say that the wages and work are considered an improvement on sewing, and this new occupation has had a perceptible keepers. We have a few women physicians in our state; I have no means of finding now several Kentuckians in the medical colleges who will soon supply this deficiency the gospel.

I have heard of no lawyers or ministers of

We have women county clerks, elected by the people. One woman, the widow of a jailer, was elected to fill his place, but it was decided that a woman was not legally eligible to the position. Another lady, widow of a county school commissioner, has been appointed in her husband's place, and the county judge has been and the superintendent of public instruction. This lady is the only female school widows with children between six and twenty years of age are allowed to vote for enough not to become a dead letter on the statute book.

In all religious and moral work women's activities have received the same impetities energy in the same lines; nearly every church has its Woman's Guild, its Woman's Auxiliary, Woman's Aid Society, etc. In addition to these strictly religious societies, various temperance societies of which women are members, have done splendid work. The largest and most wide-spread of these is the Woman's Christian Temperance surpassed her hopes, and this year promised better. There have been many prohibition victories this year under local option law, and in all of them the assistance of the benevolent work; but the list that I could make out with the means at hand would Women who are interested in the received to attempt any.

Women who are interested in the welfare of their sex can find much to encourage tage of all opportunities that are offered them; but the strong self-reliance and because it is not in their nature,—quite the contrary; but on account of the depressing I believe that such an association as this now present is admirably adapted to waken enter upon it. It is therefore with feelings both of pleasure and to inspire them with courage that the means at hand work the strong self-reliance and because it is not in their nature,—quite the contrary; but on account of them; not influence of slavery which still lingers in the social habits and opinions of the people. Our women to the posibilities of a wider future, and to inspire them with courage that the have met with them here.

SOUTH CAROLINA.

ELIZABETH HYDE BOTUME, Vice-President.

HAVE received notice that "A report upon the intellectual, moral and industrial condition and needs of the women of her state will be due from every Vice-President" of the Association for the Advancement of Women at the Annual Meeting in Louisville.

It has been so impossible for me to cooperate in any way with your Association, that I have long felt that the title of Vice-President with which you have honored me was a misnomer. I have always been deeply interested in all that tends to the Advancement of Women from the highest to the lowest, even to the most ignorant and down trodden. But many years of my life have been passed almost exclusively amongst those of one class, and these considered a proscribed race.

In 1864 I was moved, like hundreds of other women, to go South to help on the great work of education of the recently emancipated slaves. Since then, I have spent a part of each year amongst these people, directing a school for the children, and doing what I could for the parents, especially for the women whose position and condition enlisted my deepest sympathies.

When the slaves were emancipated they were like four million of children turned loose and thrown upon their own resources. And in worse condition than children, loose and thrown upon their own resources. And in worse condition than children, loose and thrown upon their own resources. And in worse condition than children, loose and thrown upon their own resources. Even the most were expected to have wisdom without education or experience. The first negro women brought under my care were called "contraband refugees" from the rice swamps of South Carolina. They had all been field bands, and knew obsolutely nothing else but field work. As a man said of his wife who was ambitious to learn to sew "she aint much on the needle, but she is great on the hoe."

In their previous condition they had always been under the care of Overseers and Drivers. Their tasks had been allotted them, and they were called to work by the Drivers. Their tasks had been allotted them, and they were called to work by the Sound of the horn. They lived in "Negro Quarters," a collection of small houses, sound of the horn. They lived in "Negro Quarters," a collection of small houses, sound of the horn. They lived in "Negro Quarters," a collection of small houses, sound of the horn. They lived in "Negro Quarters," a collection of small houses, sound of the horn. They were farnished with with usually two rooms and rarely more than three, and they was mostly done limited rations for food. In the working season their simple cooking was mostly done limited rations for food. In the working season their simple cooking was mostly done limited rations for food. They were allowed a week to "lie by" after never excused them from field labor. They were allowed a week to "lie by" after never excused them from field labor. They were allowed a week to "lie by" after never excused them from field labor. They were allowed a week to "lie by" after never excused them from field labor. They were allowed a week to "lie by" after never excused them from field labor. They were allowed a week to "lie by" after never excused them from field labor. They were allowed a week to "lie by" after never excused them from field labor. They were allowed a week to by the plantation nurse who was up their tasks, leaving the little ones to be cared for by the plantation nurse who was up their tasks, leaving the little ones to be cared for by the plantation nurse who was up their tasks, leaving the little ones to be cared for by the plantation of things. These

I do not mention these things in criticism of the old condition of things. These were the curses of slavery which engendered every evil under the sun. Many

humane masters and mistresses would have gladly bettered the conditions of their slaves had it been possible and slaves had it been possible under existing circumstances. They were held by inexorable laws which sometimes had orable laws which sometimes left them no more freedom than the people they bought and sold.

When the slave women were emancipated they were truly born again. It was a world they had entered of milest eagerness new world they had entered of which they were entirely ignorant. Their eagerness to learn was most pathetic. There eagerness all occar to learn was most pathetic. They came to us for advice on all subjects and all occasions, saying "us aint know park."

They came to us for advice on all subjects and all occasions, saying "us aint know park." sions, saying "us aint know nothing and you is to learn we." "I tell you ma'am, book larning is a great thing." book larning is a great thing," was constantly said to me.

I often thought with humility and shame of my lost opportunities when called had a upon to decide some knotty question of hygiene or others. One woman, who had a to her of my lost opportunities when to her or others. scrious "female weakness," came to me for advice and help. After partially listening I do not be. to her, as she tried to tell me of her condition, I said, "Oh Auntie, that is beyond me exclaimed my what to do for you." I do not know what to do for you." Her look of surprise was extreme, and she ledge of book.

exclaimed, "In course you know, ma'am, fur you can read books."

Alas! my know In the class a weak help when I was a weak help when I have a weak help ledge of books was a weak help when I needed to know so much of human nature.

Circumstant dimes, the marriage rate ledge to know so much of human nature. In the old times, the marriage relation was but little understood by the slaves the will of the will o Circumstances brought a couple together, but their union could only be consummated Rarely, if ever whose consent who consent whose consent who consent whose consent whose consent whose consent who consent whose consent who consent w by the will of the owner whose consent was all that was necessary for a legal marriage.

Could be allowed was there any marriage. Rarely, if ever, was there any marriage ceremony. Indeed no binding ceremony and there was no binding ceremony. The could be allowed under slavery. The ceremony. Indeed no binding ceremony and there was no binding ceremony. could be allowed under slavery. The owners could separate their slaves at any time console themselves provided to the console themselves are the consolered to the consolered and there was no help nor hindrance to this. Persons thus separated were advised to on many plantage. console themselves with other companions on many plantations, we need not wonder.

In men and women lived together freely such were the such w

At first it seemed impossible to arouse in her any conception of ness of ciths.

At first it seemed impossible to arouse in her any conception of ness of ciths. the fitness of things, and that there was any impropriety in her position.

To her man, and course, and she could divide her time between mind this was the most Christian course, and she could divide her time between mind there was any impropriety in her position.

To her man the unhapping the could off, and the unhapping the could off, and the unhapping the could off, and the unhapping the unhapping the could off, and the unhapping this was the most Christian course, and that there was any impropriety in her position.

To her man, "Tony never left man, she could not be responsible for the unhapping of the was sold off, and she could not be responsible for the was sold off, and she could not be responsible for the was sold off, and the was sold off. ness of either man. "Tony never lef" me," she would say. "He was sold off,

could not help hisself. But poor brudder Kit! You see he never have any body,

One of the first and wisest things for the freedmen, was an order issued, advising 'ceptin me," with a deep tone of pity. and urging them to come forward and be married "according to the laws of God and man." As soon as these poor ignorant people understood that this was a forward step in civilization in civilization, they were all eager to have the marriage ceremony performed and get a "Tiffity" as they called the certificate. Many aged couples came forward to be married who have the certificate. Many aged couples came forward to be married who had lived together as man and wife for a quarter of a century. It was assoniching astonishing to us all, how this one act lifted these people up. When they heard "Those where "Th "Those whom God hath joined together let no man put asunder" pronounced, and walked walked away with a certificate in their hands, it was with a new consciousness of their freedom and it.

One day a couple came to the school house to meet the minister and be married.

Y had lived. On this freedom and independence. They had lived together in the old way, and had a family of little children. On this occasion that occasion they came direct from the field in their working clothes, and as usual the working working clothes. woman walked behind the man. When they left after the ceremony, the wife stepped to the side of left and the side of left after the ceremony. to the side of her husband and walked along, saying, by this simple act alone "We are now one are now are now one, and I am your equal." There was a freedom and dignity about them never seen by never seen before. Not long ago two children of this couple were married but under what different. what different circumstances. On both occasions ample preparations were made. The brides were day brides were dressed with care and in the latest style, for the style and fashion seem to come to the c come to the colored women by intuition. Wedding guests were "bidden" and entertainment. These are entertainment provided and all conducted in the most decorous manner. These are country people. country people and belong to those known as "field hands." I only cite this to indicate their process. cate their progress since freedom. In those first days the possession of a marriage certificate was '' certificate was like a roll of honor giving dignity and respectability, and all who could were eager to re-

Chaplain Woodworth married a poor couple one night and the next day the man e to his house came to his house and handed him the certificate, saying, "look here parson, I ain't want this fifther y want this tiffity, I wants you to take this back and give me my dollar. I don't like that gal no how?" that gal no how." He was much chagrined to find this was not a trade and barter;
That the parson That the parson could bind but not loose them, and he went away muttering "I ain't know dat. I sin't

At first the slave refugees—known then as "Contrabands,"—were huddled ther in barreely together in barracks, or small houses, with nothing but the roof over head and a floor under foot, to contral houses, with nothing but the roof over head and a floor with the roof over head and a floor under foot, to contral houses, with nothing but the roof over head and a floor with the roof over head and a floor over head and a floor over head and a floor under foot, to contral houses, with nothing but the roof over head and a floor under foot, to entitle them to the name of dwelling.

Saxton, then Mill.

Secondary for the dwelling of dwelling.

Coordinated and Florida, with Head-Saxton, then Military Governor of South Carolina, Georgia and Florida, with Head-quarters at Beautres. quarters at Beanfort, secured lands for the freedmen. He was always their judicious and devoted friend. and devoted friend, and with rare foresight and wisdom he took in their future possibilities. Nothing could be sold to manhood like the possession of lands bilities. Nothing could lift them from chattels to manhood like the possession of lands and homes. He was a for them the right to buy their lands. and homes. He was the first who secured for them the right to buy their lands.

After the law was the first who secured for them the right to buy their lands. After the law was passed which enabled them to do this, all the freed people were eager to become the law was passed which enabled them to do this, all the freed people were eager to become the law was passed which enabled them to do this, all the freed people were eager to become the law was passed which enabled them to do this, all the freed people were eager to become the law was passed which enabled them to do this, all the freed people were eager to become land owners. Women who worked early and land owners. Women who for the army and sons in the army, worked early and land owners. Women who had husbands and sons in the army, had had husbands and husbands are had had husbands and husbands and had husbands and had husbands and had husbands and husbands and had husbands and had husbands and had husbands and husbands and had husbands and had husbands and had husbands and husbands and had husbands and had husbands and had husbands and husbands and had husbands and had husbands and had husbands and husbands and had husbands and had husbands and had husbands and husbands and had husbands and had husbands and had husbands and husbands and had husbands and had husbands and had husbands and hu worked early and late to save "the little of money" to buy a ten acre lot. Three that the land in the fourths of the land in this vicinity was bought by women, and the deeds still stand in their names. their names.

When Gen. Howard was placed at the head of the Freedman's Bureau, he caused we to be passed that no load had been as the head of the Freedman's Bureau, he caused a law to be passed that no land belonging to the Freedman's Bureau, ne gaged, or in any way alienated from the Freedman could be sold, or mortgaged, or in any way alienated from them for six years from date of law. This was to secure these poor ignorant people from carpet-baggers, sharpers and ill advisers—a most wise provision. All the colored most wise provision. All the colored women around me worked in the fields. Indeed for planting and cultivating cotton to the men-

for planting and cultivating cotton, they were considered better workers than the men.

In the first days education was the were considered better workers than the men. In the first days education was the end and aim, over and above all else of the people. "Oh, book larning is and aim, over and above all else of the said. freed people, "Oh, book larning is such a great thing!" they constantly said. Doubtless many considered this was a part of their new condition as a freed race.

Something to be put on like a new race. Something to be put on like a new garment, to be worn as a badge of their changed condition. All flocked to the school, old men and women and young children, eager madising a lesson." Many seemed to the "to catch a lesson." Many seemed to think a lesson was to be taken like a dose of say "please and carried arranged lesson would

medicine or a cup of tea and carried away like a bundle from a store. Women would In time the cut a lesson quick, I is bundle from a store. say "please give me a lesson quick, I is hasty and I want to go."

In time the old people saw that this "was a race they could not run," and one a that the okita. after another dropped out of the ranks, saying with dejection "I is too old to larn.

It was one of the ranks see that the children mus' larn fur we. They is to come up when us drops down.

They is to come up when us drops down.

We rare It was one of our privileges to help the sick and those in trouble. We rarely beg for some half to get to me turned away from any tale of distress. But one morning an old woman came to me who had just "gone to the sand "some little the some morning and those in trouble. We ran to beg for some baby clothes and "some little the some morning and the some to me and "some little the some morning and the some to me and "some little the some morning and the some little the some morning and the some little the to beg for some baby clothes and "some little thing to put in mouth" of a young girl I was greatly tried on the same was a second to be trouble, who had just "gone to bed." This was a case that had given us much trouble, and "No Aunty Join" Spoot girl's miedaga.

"No Aunty, I will not do anything. Don't tell me about that girl," I said.
"Never mind or Her ain't got noth." "But poor creatur! Her ain't got nothing," she said. "Never mind. She has brought this trouble upon herself. She knows better "That's 50 ma'are on to do as the has done," I continued than to do as she has done," I continued.

"That's so ma'am. That's so. But her is punished oncommon, an' I run off to But not for her." I shake heart for the sink in the point of the sink you, fur I knows you always has beart for the sick," said the old woman.

"But not for her," I answered the sick," said the old woman. "But not for her," I answered, trying to keep strong and not to look at her pitiful face. "Don't talk to me about that girl."

"In course ma'am. In course," said the old woman slowly. "Tinna knows dis is waiting on me." said the old woman slowly. "Tinna knows for them best, Tinna must know best, fur you can read the Bible. But I mus' go now for them I must know best, for I can read the Bible. But I mus' go now is a similar that is without fault casting the Bible? And what does the Bible say about a casting the first stone.

"him that is without fault casting the Bible? And what does the Bible say about stop Aunty," I said in should hopeleed and about judging "lest we be Hearled". judged?" What did I know that I should hopelessly condemn this poor creature.

"Stop Aunty," I said, "You shall not go hack mithant halp." "Stop Aunty," I said, "you shall not go back without help."

Her look of gratitude and her famous "Coal Mark without help."

Her look of gratitude and her fervent "God bless you ma'am!" overwhelmed entirely

These days are now long gone by, and the freed people are living under entirely uilt. They have houses they built only shelfar tasts on their newly acquired new conditions. In the first days they built only shelter tents on their newly acquired and gardens around window.

Out Diess you ma'am:

lands. Now they have glove by, and the freed people are living under entirely and gardens around window.

Out Diess you ma'am: lands. Now they have houses they built only shelter tents on their newly acquired and gardens around their houses in place of the heavy most of them excellently built. They have houses and out buildings, most of them excellently them require two sets. People are not the heavy wooden shutters, and piazzas of the heavy wooden shutters, and piazzas of them excellently the sets. In the towns the people are not content with a house of one story, but most of the story, and property was curious to mark their not year by year in the second property with a house of one story, but most of the second property with a house of one story, but most of these second property with a house of one story, but most of these second property with a house of one story, but most of these second property with a house of one story, but most of these second property with a house of one story, but most of them excent property with a house of one story, but most of them excent property with a house of one story, but most of them excent property with a house of one story, but most of them excent property with a house of one story, but most of them excent property with a house of one story, but most of them excent property with a house of one story, but most of them excent property with a house of one story, but most of the second property with a house of one story, but most of the second property with a house of one story, but most of the second property with a house of one story, but most of the second property with a house of one story, but most of the second property with a house of one story, but most of the second property with a house of the second property with a h them require two stories. REPORT OF THE

Committee on Industrial Education.

Anna D. French, M. D., Chairman.

N arranging to prepare a report upon Industrial Education which would be of N arranging to prepare a report upon Industrial Education that is some interest and to the purpose, your committee has been materially handicapped by two

by two prominent factors, which have rightful bearing on the case. First, the vastness of the subject, and the extent of domain which it occupies, next, the restrictions naturally imposed by the limits of a single report.

No work in the field of Education more occupies the attention of thinkers and modern educators to-day, than does that of the establishment of Industrial Art and other CD and other CD. and other Training, as an integral part of our common school curriculum.

In the V. I.

In the light of these truths, and in the fact that the subject has been ably discussed from the platform and through the press, it has seemed best to your committee to present it work already accomplished to present in this, their first report, a condensed resumé, of work already accomplished in these transfer to present in the platform and through the press, it has seemed because accomplished to present in this, their first report, a condensed resumé, of work already accomplished in these transfer to the platform and through the press, it has seemed because a complished to present in this, their first report, a condensed resumé, of work already accomplished to present in this, their first report, a condensed resumé, of work already accomplished to present in this, their first report, a condensed resumé, of work already accomplished to present in this, their first report, a condensed resumé, of work already accomplished to present in this, their first report, a condensed resumé, of work already accomplished to present in this, their first report, a condensed resumé, of work already accomplished to present in this present in the present in in these lines in other countries, where the initiatory steps were taken, and in our own; rather these lines in other countries, where the initiatory steps were taken, and in our own; rather than to attempt an elaborate showing of the degree of success which is attending many tending more recent endeavors in this direction, either as a whole, or by presenting a more or less. more or less careful analysis of the systems and methods now employed by Industrial Schools. trial Schools and Classes. And also for the reason, that outside the circle of those who are greatly the control of the systems and methods have made themselves as are greatly interested in the subject, but comparatively few, have made themselves as familiar as all and also for the reason, that outside the sade themselves as familiar as should be, with what has already been projected or accomplished industrially, in convenience of the comparative of trially, in connection with common school work, hence they do not realize the important hearing the common school work, and will continue to exercise upon Portant bearing which those earlier efforts have had, and will continue to exercise upon the greater work.

To follow out this plan, has led us well into the field of statistical and historic rd—but if in the field of sufficient import to form record—but if in the roaming, facts have been gathered of sufficient import to form even a slight but it is now even a slight basis for a more intelligent comprehension of the situation as it now stands, and for the situation as it now perchance stands, and for more accurate data and sounder conclusions, we may perchance forgive the days forgive the dryness of investigation, through which they have been derived.

We have

We have therefore to make the recapitulation sufficiently thorough to convey a idea of the recapitulation. fair idea of the nature and extent of work already done, though necessarily much of value has been already done, though necessarily much already done, though necessarily much already done, though necessarily much necessarily much positive data of a reliable nature, and of value has been excluded, partly from lack of positive data of a reliable nature, and again to secure and extent of work already done, though necessary and of value has been excluded, partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and again to secure and other partly from lack of positive data of a reliable nature, and a secure and other partly from lack of positive data of a reliable nature, and a secure and other partly from lack of positive data of a reliable nature, and a secure and the positive data of a reliable nature, and a secure and the partly from lack of positive data of a reliable nature, and a secure and again to secure you from a length of recital which might prove tedious. To obtain the facts given the facts given, every source of information has been utilized that could well be reached.

Catalogues, revery source of information has been utilized that could well be reached. Catalogues, reports from Institutions, from Bureaus of Education, United States and Others—, also were als others, also verbal reports from those carrying on the work in Schools, Colleges, and Private Classes; by correspondence, and lastly, by personal inspection of the work in many Schools, Classes, and D. C. in many Schools, Classes, and Reformatories.

As all know, to the Old World is due the credit of inaugurating and establishing Schools for Technical and Industrial Education; schools which gave almost exclusive attention to training in the T

sive attention to training in the Industrial Education; schools which gave almost England, through its Museum Museum England, through its great Educational Centre, the South Kensington Museum Schools, (schools which and Schools, (schools which are now duplicated all over its Kingdoms) inaugurated a noble and most comprehensive with a property of the conditional comprehensive with the conditional conditions of the conditional conditions and the conditional conditions are conditional conditional conditional conditions and conditional conditions are conditional conditional conditional conditions and conditional conditions are conditional conditional conditions and conditional conditional conditions are conditional conditional conditional conditional conditions are conditional co noble and most comprehensive work, for the benefit of her young people and Artizan Classes. The stimulus for her our. Classes. The stimulus for her efforts, had its inception and birth, in failure. The exhibit at Hyde Park in 1851 showed the that pertained to artistic excellence of the exc that pertained to artistic excellence. She was far behind her sister countries and ance, to learn that as far as Art and the was humiliated to a point beyond endurance, to learn that as far as Art and manipulative skill was concerned, her work was more of a reproach than a credit and the concerned than a credit more of a reproach than a credit, and she went to work in a most vigorous and persistent manner, to start the plan of radar were entited. tent manner, to start the plan of redemption, to which her young people were entitled, and to place herself in a position to vie with the World, in the products of

That the World has been the better for these efforts in her own behalf, both in Art and the world has been the better for these efforts in her own behalf, both in Art industries, none will denve be the better for these efforts in her own behalf, both in Art industries and ind and other Industries, none will deny. Every department of productive industry received Cookers. Those of Industrial Arts and M. attention. Those of Industrial Arts and Manufactures, and of Domestic Economy and class rooms. Mr. Buxton in Manufactures, and of Domestic Economy and class rooms. Cookery prominently. great work accomplished by them last spring, in bringing together the Industrial work of the schools of New York and other cities. They planned to stop within limits of 30 miles, but as the fact of the projected exhibit became known, applications for space came from parts as remote even as Chicago and St. Louis. There were 70 separate exhibits from schools and institutions representing the work of thousands of children in groups, and 140 individual exhibits. Out of the 70 exhibits 54 were from New York and vicinity, the remainder from Philadelphia, New Haven, Boston, Worcester, Chicago, Cleveland, St. Louis, Chautauqua, Jamestown, and the Indian school of Carlisle, Pa. There were three exhibits of foreign work. In the 54 exhibits from New York and vicinity, only two represented public school work, those of Hoboken and Jersey City. Upwards of 7,000 persons visited this exhibit, which lasted one week. Its influence was most useful and stimulating. One or two cooking schools are doing good work in New York city. Carriage making is taught at the Metropolitan Museum Schools, in connection with drafting. At the regular Trade schools, masonry, fresco-painting, stone-cutting, plumbing, carpentering, wood-carving, etc. At the Cooper Union type carving, etc. At the Cooper Union, wood engraving, telegraphy, phonography, type writing, and photography. hesides its writing, and photography, besides its work in the Industrial Arts. The Young Woman's Christian Association and the Society of Decorative Art each have classes in in Industrial work of many kinds. The latter does much good through its classes in embroidery. At Pelham manor children embroidery. At Pelham manor children are taught many useful and artistic industries.

At the Catholic Protectory, at West Character taught many useful and artistic industries. At the Catholic Protectory, at West Chester, New York, is added to the Industrial branches usually taught, silk weaving his branches usually taught, silk weaving, kid glove making, and electrotyping. The asylums of New York all teach remunerations making, and electrotyping. asylums of New York all teach remunerative industries in connection with book study. At the Brooklyn Orphan Asylum astrollar study. At the Brooklyn Orphan Asylum netted hammocks are made, also tennis nets in connection with the heavier industrice. connection with the heavier industries. We see then in the city and surroundings of New York, there is really a great deal of another than the city and surroundings of the city and surroundings. New York, there is really a great deal of excellent work done in Industrial lines; the point to regard is, that as yet it has not become work done in Industrial lines; the public point to regard is, that as yet it has not become to any extent a part of the public school work. This feature accomplished many extent a part of the public school work. This feature accomplished, we shall have what all endeavors for advancement or reform should have, viz: a regular systematic central base from which to work. Then and then only can ward as systematic central base from which to work. Then and then only can we get out of the effort all that in it lies, at proper expenditure of time, thought, and means. Then and not till then, will the work cease to be more or less desultory in its character, accompanied with much loss concentrated, of time, misuse, and ill adaptation of energies, which if properly concentrated, would be far richer in profitable results than the properly concentrated, would be far richer in profitable results than we can now realize, as among things possible. All through the wide domain of New York State, efforts are being made in the scarcely greater or less ways to increase the scope of Industrial Education. It is scarcely to recapitulate the work done at Caratterial Education. It is scarcely necessary to recapitulate the work done at Cornell University, Ithaca. There, is shown an energy and completeness of which we are justly proud. Buffalo and Syracuse both have established Women's Industrial Line. cuse both have established Women's Industrial Unions, modeled after the parent so-

ciety at Boston. Their Industrial classes are said to be in a very flourishing condition; 50 New Jersey.—At the Stevens Institute of Technology, instruction is given in the chanical drawing and the construction is given in the question. mechanical construction, mechanical drawing, and work in the shops. where Industrial Training was to become a feature. I have not been able to get other particulars concerning this: Asylums for deaf, dumb and blind, also Reformatories, provide some form of Industrial Training to their inmates.

Michigan.—At Detroit we find excellent work in an Industrial way in connection with public school work. Carpentry, joinery, clay modeling, mechanical drawing, and keeping accounts, are some of the branches taught at Muskegon. The want of some sort of Industrial Training was discussed vigorously in 1883. This induced several Philadelphia ladies to offer their services as teachers, and most enthusiastic classes were organized and maintained by them. The Michigan State Agricultural College, at Lansing, has a farm of 676 acres. Students learn practically, agricultural chemistry, horticulture, stock breeding, surveying and laying out of grounds. In 1883, one young woman graduated from the college in a class of 29 young men. The asylums for deaf, dumb and blind, all train their young people industrially,

MINNESOTA.—We may well preface its record by the statement that women may hold any office pertaining solely to the management of public schools. At Minneapolis the public school system is Industrial; hence much attention is given to the principles of construction, representation and object drawing. The State University, in its College of Agriculture, pays special attention to the usual features attendant upon the subject. In its department of the usual features attendant upon the subject. In its department of mechanical arts, an Artisans Training School mechanics and attention to the usual features are meets the needs of mechanics and attention to the usual features are mechanical arts, an Artisans Training School meets the needs of mechanics and others, and takes the place of the course in shop work and drawing, as hitherto given. The work and drawing, as hitherto given. The asylums for deaf, dumb, blind, and for feeble minded, also the reformatories control of the course in the sylums for deaf, dumb, blind, and for deaf, dumb, dumb feeble minded, also the reformatories, give specific attention to the practical industries.

A personal friend of mine who had the A personal friend of mine who had charge of classes at the Faribault Training School for Imbeciles and Idiots, stated to me not long since that the aptitude for Industrial work, after the iniatory steps in teaching the latest that the aptitude for Industrial

work, after the iniatory steps in teaching had been taken, was something remarkable.

Wisconsin.—The Wisconsin has had been taken, was something remarkable. Wisconsin.—The Wisconsin Industrial College for Girls, at Milwaukee, has classes in dress making, under an excellent teacher. Hoods and other crochet work, are made for the trade. Last vear since teacher. Hoods and other crochet work, are made for the trade. Last year sixteen of the girls, with a matron, received practical lessons in cooking at the Milwanka. Cold girls, with a matron, received practical lessons in cooking at the Milwanka. tical lessons in cooking at the Milwaukee Cooking School. Exhibition of the scholastic and Industrial work done at this institution, was shown at Madison last year a similar exhibit was made at Miles and Madison last year a strength attention This year a similar exhibit was made at Milwaukee, which attracted much attention at Wauand aroused substantial interest. The Wisconsin Industrial School for Boys, at Waukesha, gives instruction in farm work, shoe making, and knitting. The deaf, dumb,

Custodian's Report.

LITA BARNEY SAYLES, Custodian.

KILLINGLY, CT. HE Custodian desires to make a statement and Report concerning the publications of the A. A. W. which have been in her care since the 10th Congress, at Portland, Me. So many inquiries come to her, both from members, and from Libraries that desire to receive a file of our publications from the first, that some little explanation of the inability of this Association to supply just what is often asked, is

Speaking generally, for the first ten years of our existence, our publications, with the exception of those of the first Congress, have not much more than filled the demands of the membership, which has made it impossible to answer the calls for complete files, which are now considered so desirable by many members, as well as by Libraries in various places. There was a good edition of the First Congress Papers issued, but as the Association was young and modest, and not yet fully cognizant of its own powers and uses, it did not form the property as it. its own powers and uses, it did not force its Report upon the world, nor value it, as it should, and the bulk of the edition which should, and the bulk of the edition, which was stored in the house of a lady who went to Scotland for a few years is small by an went to Scotland for a few years, is supposed, in some way, to have been sold by an irresponsible person to the ragmen (This irresponsible person to the ragman. This first Report, which covered 198 pages and consisted of the thirty-five articles. consisted of the thirty-five articles presented at the first Congress in 1873, would be

Only three Papers of the 2d Congress, at Chicago, were published, and but a small edition; but after the 3d Congress, at Chicago, were published, and but a sing, the list of officers and committees for the twenty papers given at this meeting, the list of officers and committees for the ensuing year, and also that of the

After the 4th Congress, which was held in Philadelphia in '76, the Papers were plished on 125 pages, which also contains the balance of the Papers were members, published on 125 pages, which also contained the addresses of officers and members, and in an appendix gave a very condensed by and in an appendix gave a very condensed history of the inception of the movement.

This edition did not exceed 500, if I remember rightly, and was soon exhausted. The Report of the 5th and 6th Congresses was made by the Secretary in about ee pages, to which was added a list of one three pages, to which was added a list of officers and members, and chairmen of committees. This was the first Secretary's raport and members, and chairmen of committees. This was the first Secretary's report, and the first time also that the Treasurer

The 7th Congress was held at Madison, Wis., and was merely summarized by Secretary in a small pamphlet which also the Secretary in a small pamphlet which also contained the lists of officers, members, and committees. The Treasurer's report the lists of officers, members, and committees. The Treasurer's report was included, and two Papers were pub-

The 8th Congress convened in Boston, and the reports of its Secretary and easurer, lists of officers and members, the reports of its Secretary and five Treasurer, lists of officers and members, the reports of five Vice-President's, and five

of the Papers given at the Congress, including the opening address of the President

In 1881 the 9th Congress was held in Buffalo, N. Y., but was only reported by the Secretary's summary, the Treasurer's report, and the usual lists of officers and members, with four Papers published separately, and in small editions.

After the 10th Congress, at Portland, Me., in addition to the Secretary's report, etc., as before enumerated, the reports of the various committees and of the Vice-Prestdent's were issued, which was the first time with the exception of the Boston Congress, that the reports of the Vice-President's had appeared. Six Papers of this Congress were also printed, one of which is a statistical review, in condensed form, of the ten Congresses then past, with the historical Papers connected with its origin. This edition consisted of 800 copies, and was considered a large one. Since that time, however, our editions each year have been increased to 1000 each of the Reports and Papers, so that a portion of the issue has been placed in the hands of the Custodian, who is required to furnish members so far as possible with what they desire, to send to Libraries, and to make up a miscellaneous collection as messengers to each The friends will therefore notice the impossibility of making up setts, and the place of meeting before the Congress arrives.

almost impossibility of furnishing anything published previous to the Portland edition The issues of the 12th, 13th and 14th Congresses can easily be supplied, and all

of 800, which is now nearly exhausted. requests will be specially attended to by addressing the Custodian.
